INFORMATION SECURITY RISK ASSESSMENT

THREAT **READY**

LRQA

Your Risk Management Advantage

ASSESS. GOVERN. CERTIFY.

The cyber risk landscape is complex and unrelenting. Even organizations with strong IT controls often struggle to quantify the actual business impact of their information security risks.

In today's environment, identifying, analysing and treating risks systematically is essential. This is not just for compliance, but for strategic resilience.

Many organisations rely on ad-hoc risk assessments or generic checklists that fail to account for unique business contexts or risk appetite. This lack of structured methodology leads to wasted resources, misaligned priorities, and hidden vulnerabilities that remain unaddressed until it is too late.

Conducting an ISO-aligned Risk Assessment allows organisations to map their threat landscape against critical assets, quantify exposure, and make defensible, data-driven decisions on where to invest.

SERVICE PRINCIPLES

STRATEGIC ALIGNMENT

We ensure cyber risk is not treated in isolation. By applying ISO 31000 principles, we align information security risks with your broader enterprise governance, ensuring security supports your strategic business objectives.

CONTEXT DRIVEN

We move beyond generic threat lists. We establish the specific context of your organization through identification of your unique assets, constraints, and risk criteria. We deliver an assessment that is relevant and realistic.

ACTIONABLE OUTCOMES

We don’t just identify problems; we define solutions. Our output provides clear Risk Treatment Plans (avoid, modify, share, or retain) that empower you to reduce exposure and demonstrate due diligence.

OUR APPROACH

Context Establishment & Scoping

We conduct workshops to define the scope of the IT Estate, identify critical information assets, and establish your organisation’s risk appetite and acceptance criteria.

Risk Assessment (Identification, Analysis, Evaluation)

Using established ISO methodology, we identify specific threats and vulnerabilities relevant to your assets. We then analyse the likelihood and impact of these scenarios to evaluate and prioritize risks based on their severity.

Reporting and Treatment Planning

We deliver a comprehensive Risk Assessment Report and a prioritised Risk Register. We work with you to develop a Risk Treatment Plan that selects appropriate controls to mitigate identified risks effectively.

ABOUT LRQA

LRQA is a leading global risk management partner.

Through our connected risk management solutions, we help you navigate an evolving global landscape to keep you one step ahead.

From certification and cybersecurity, to safety, sustainability and supply chain resilience, we work with you to identify risks across your business. We then create smart, scalable solutions, tailored to help you prepare, prevent and protect against risk.

Through relentless client focus, backed by decades of sector-specific expertise, data-driven insight and on-the-ground specialists across assurance, certification, inspection, advisory and training, we support over 61,000 organisations in more than 150 countries.

LRQA – Your risk management advantage.
