EVOTIX ASSURE BEHAVIOURAL SAFETY MANAGEMENT SOLUTION PRICING

The Evotix Assure Behavioural Safety management solution is priced at £9,495+VAT per annum.

This includes:

- License for 50 management seats
- Support, which includes:
 - Inclusive service requests e.g., data imports, scripts (bulk updates, relabel records, bulk delete)
 - One-off Implementation services and configuration, Including training
 - Ongoing Change Management support and customer engagement
 - Adoption pack: Self-service internal promotional pack to aid embedding systems, managing change, engaging workforce, measuring ROI
 - Shared Customer Success Manager, email requests via support portal
 - Individual customer success plan developed
- Maintenance
- Automatic updates

The price for the Evotix Assure Behavioural Safety management Solution is based on an organisation size of up to 500 employees. Should your business be larger than 500 employees, please get in touch.

Available separately, the AssureGO+ app provides unlimited, unlicensed user access to report observations and complete behavioural safety tours, online and offline. Please see our additional listing for the Evotix Assure Core and Safety App.

SOLUTION DISCOUNTS

Each Assure module works standalone but integrates powerfully with others to provide you with a complete, integrated solution. Evotix also offers solution packages tailored per industry, also found on G Cloud.

Combining individual modules into a solution that meets your requirements will allow you to accumulate 'seats' to access the system. Should you not require access for this increased number of users, seats can be discounted to reduce the overall purchase price of your tailored solution. Please contact Evotix to discuss these options.

TRAINING

Evotix provides users with three training delivery options dependent upon customer requirements –online via webinar, or onsite at our training facilities in Glasgow and Manchester, or at your organisation.

Onsite training at either your site or our offices is priced from £950+VAT per day, but this is subject to location and travel expenses. To gain maximum benefit we recommend a classroom size limit of seven users. However, over a full day, we can train seven users in the morning session and seven more users in the afternoon session.

Online training via webinar is priced from £100+VAT per hour. Again, we recommend a maximum online classroom size of up to seven users.

Assure has been designed with the user in mind, combining an intuitive consumer style interface with a corporate strength backbone. As a result, it meets business requirements while being straightforward and intuitive to use – not just by experts but by your organisation at large.

Although influenced by the number of, and the level to which, users are to be trained, the number of training days required is always at your discretion. However, we will discuss with you a suitable number of days and which delivery method is best suited to your individual requirements.

EXISTING DATA IMPORT

Extracted data from any legacy system can be imported into Assure. Data import is priced from £3,000+VAT. Please contact Evotix to discuss your data import requirements.

ADDITIONAL SEATS

Should you require more users to access the data in the system, additional licenced seats can be purchased alongside the module, starting from £975+VAT for a bundle of 50. Please contact Evotix to discuss your additional seat requirements.

SUPPORT

Included is our standard support offering, which includes 8.30–5.30 tech support desk. Should you require additional support outside of these hours, or any services not included in our support listing above, please contact Evotix to discuss.
