Service Description

Microsoft Power Platform - Power Pages

NODE4 © 2026

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

ABOUT THE SERVICE

The Microsoft Power Platform: Power Pages service is designed to empower organisations to create secure, low-code websites that are seamlessly integrated with Microsoft's suite, offering a comprehensive solution for website development. This service simplifies the entire process of building external-facing websites, from design and implementation to hosting and management, featuring advanced integration capabilities for a streamlined web development experience.

Key features of the service include a low-code development platform enabling quick creation of sophisticated and secure websites, integration capabilities with Microsoft Dynamics 365 and other Power Platform services, a user-friendly interface for effortless website design and content management, and robust security features to ensure data protection and compliance. It also offers customisable templates, advanced data integration for dynamic content, mobile-responsive design, SEO-friendly features for improved visibility, scalable solutions, and training and support for site development and management.

The benefits of using this service are manifold: it simplifies website creation with intuitive development tools, seamlessly connects web interfaces with enterprise data, empowers teams to manage web content without needing technical expertise, and ensures online security. The service enables rapid deployment of brand-consistent websites, offers dynamic content capabilities for a more engaging user experience, guarantees optimal web accessibility across devices, improves online discoverability, adapts to changing business needs with scalable web solutions, and provides comprehensive training and support for ongoing website management.

However, there are constraints to consider. The reliance on low-code capabilities might limit customisation options for more complex requirements. Seamless integration with Dynamics 365 and other services demands careful configuration to maintain data protection and compliance standards. While the interface simplifies content management, non-technical staff may require training to fully utilise advanced features. Additionally, maintaining scalable solutions and leveraging SEO-friendly features for optimal online presence necessitates ongoing management, which could be challenging for organisations without dedicated resources for continuous website optimisation and updates.

East Sussex Fire & Rescue Service

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

CLIENT SUCCESS

FROM 7 DAYS TO 5 MINUTES – A 99.9% REDUCTION IN TIME

ESFRS's previous manual SSRI process meant crews assessing the risk at premises had to make handwritten notes, fill out a Word document and then send an email to their respective Station Manager for approval. This was prior to the SSRI document being uploaded manually to a SSRI system and downloaded to the services' Mobile Data Terminals (MDT), located on each fire appliance, for use when in transit and at incidents. This process could take up to seven days to complete.

ESFRS identified this process needed upgrading to meet aspects of the Grenfell Tower incident recommendations and to modernise the technology in use and reached out to their ICT managed service provider and trusted partner, Telent, to help them kickstart the process.

With the support of strategic partners, Telent have been working with ESFRS since 2016 to transform key operational processes. In this instance, commercial, out-of-the-box solutions were available – but ESFRS and Telent felt that a purpose-built, configurable solution would be better placed to meet all requirements and deliver maximum impact and improve safety.

Telent introduced Node4, to ESFRS and what they had set out to achieve, and together we mapped a way forward for the organisation. The end solution would support ESFRS's digital strategy, with a focus on alignment of digital risk data collection and current guidance, and the introduction of an auditable digital process for collecting and communicating risk data.

> "Self-service was a key driver in this project for us, with risks continuously changing, and new risks regularly being discovered, it was important that any new requirements could be added to the form as and when needed."

DEREK HAMILTON
STATION MANAGER – OPERATIONAL LEARNING & INTELLIGENCE

THE JOURNEY SO FAR...

2004 - 2014

THE EARLY YEARS

Founded in 2004
By Andrew Gilbert
Opened 3 data centres
LETN acquisition

2015 - 2016

BUILDING SOLID FOUNDATIONS

Bowmark Investment
Premier IT & Reconnix acquisition

2017 - 2018

DEVELOPING PUBLIC CLOUD

N4Stack Launched covering public cloud, data & DevOps
HSCN achieved

2019

ACQUISITION SUCCESS

Secura acquisition
Employee Experience Awards winner

2020

PANDEMIC RESPONSE

Launched N4Engage
COVID-19 Response
Launch of SD-WAN

2021

EVEN MORE GROWTH

Starcom acquisition
TNP acquisition
MS Azure Expert MSP
Providence Investment

2022

LOOKING TO THE FUTURE

risual acquisition
Tisski acquisition
Launched Azure Hybrid Cloud
Great Place to Work 3 years in a row

2023

THE FUTURE IS HERE

TNP, risual, Tisski and core Node4 teams join together
BizApps and Power Platform capability rollout
Microsoft Inner Circle status acquired through Tisski
ThreeTwoFour acquisition

IT'S OUR CULTURE THAT MAKES A REAL DIFFERENCE TO YOU

When it comes to ESG, our actions speak for themselves.

NET ZERO by 2030

We already power our data centres with renewable power. Beyond that, we partner with Carbon Neutral Group to offset our other emissions.

UNITED NATIONS SUSTAINABILITY DEVELOPMENT GOALS

We're continually working to align our CSR strategy and activities with the United Nations 17 Sustainable Development Goals (SDGs) at both a local and national level.

Each of our employees is fuelled by a passion for technology and what it can do to make your organisation grow.

We're vibrant, passionate and united by a dedication to delivering **EXCEPTIONAL SERVICE AS A STANDARD**, not only to our clients, but to each other too.
