LRQA

Your Risk Management Advantage

STRATEGISE. IMPLEMENT. SUCCEED.

In today's fast-changing digital world, complex cyber threats demand more than just high-level advice. Many organisations struggle to bridge the gap between strategic planning and practical execution.

LRQA's CISO Support Office (CSO) provides a service that goes beyond the traditional virtual CISO (vCISO) model. We combine strategic consultancy with hands-on support to deliver a robust, end-to-end information security program tailored to your needs.

Unlike services that focus solely on strategy, the CSO ensures both planning and execution are covered. This outcome-based approach helps you achieve specific goals efficiently, whether that is strengthening security maturity, meeting regulations or integrating new technologies.

The service is led by a Strategic Consultant who orchestrates the program while leveraging LRQA's award-winning Subject Matter Experts (SMEs) for specialised technical tasks.

SERVICE PRINCIPLES

HOLISTIC APPROACH

We blend strategic guidance with hands-on support. This provides a complete information security program rather than just isolated advice, ensuring your security goals are fully realized.

OUTCOME-BASED

Every action we take is aligned with specific, collaboratively defined objectives. We focus on delivering measurable results, such as achieving compliance or reaching a target maturity level, rather than just delivering hours.

STRUCTURED AND FLEXIBLE

Our engagement is structured into clear phases to ensure progress, yet remains flexible enough to adapt to your evolving needs while staying focused on the agreed outcomes.

OUR APPROACH

Cyber Strategy Development

We begin by understanding your current setup and business goals through workshops. Our Strategic Consultant crafts a tailored Cyber Strategy document, including a detailed roadmap with timelines, milestones and KPIs to track progress.

Implementation

We oversee the execution of the strategy, bringing in specialised LRQA services (such as penetration testing or threat intelligence) as needed. Quarterly reports keep stakeholders informed and aligned with your goals.

Closure and Future Planning

We confirm all objectives have been met through a thorough review. In addition, we provide a retrospective analysis of actions taken and offer recommendations for ongoing security improvements to maintain resilience against future threats.

ABOUT LRQA

LRQA is a leading global risk management partner.

Through our connected risk management solutions, we help you navigate an evolving global landscape to keep you one step ahead.

From certification and cybersecurity, to safety, sustainability and supply chain resilience, we work with you to identify risks across your business. We then create smart, scalable solutions, tailored to help you prepare, prevent and protect against risk.

Through relentless client focus, backed by decades of sector-specific expertise, data-driven insight and on-the-ground specialists across assurance, certification, inspection, advisory and training, we support over 61,000 organisations in more than 150 countries.

LRQA – Your risk management advantage.
