Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's fixed price Microsoft 365 Purview Compliance service helps organisations protect information, meet compliance obligations, and reduce risk. We design and implement Purview controls to manage data lifecycle, sensitivity, and regulatory requirements across Microsoft 365.

Service Details

The Microsoft 365 Purview Compliance service is designed to help organisations understand, configure, and operationalise Microsoft Purview. Valto works with stakeholders to understand regulatory obligations, data risks, and compliance objectives across the business.

We assess how information is created, stored, shared, and retained across Microsoft 365. Using Microsoft Purview capabilities, we design and configure sensitivity labels, retention labels, data loss prevention policies, and compliance controls aligned to organisational requirements.

Our approach focuses on balancing compliance with productivity. We ensure controls are practical, understandable for users, and embedded into everyday ways of working without unnecessary friction.

Following delivery, Valto provides clear documentation and recommendations for ongoing governance and improvement. This ensures organisations can confidently manage compliance as data volumes, regulations, and business needs evolve.

Service features

- Microsoft Purview capability assessment
- Sensitivity label design and configuration
- Retention label and policy setup
- Data loss prevention policy implementation
- Information protection and classification guidance
- Compliance and regulatory requirement alignment
- User experience and usability considerations
- Integration across Microsoft 365 workloads
- Testing and validation of policies
- Documentation and governance recommendations

Service benefits

- Improves control over sensitive information
- Reduces risk of data misuse or leakage
- Supports regulatory and compliance requirements
- Improves visibility into data handling
- Protects information without reducing productivity
- Establishes consistent information governance
- Improves confidence in compliance posture
- Reduces manual compliance effort
- Supports secure collaboration
- Improves long-term information management

Service constraints

Appropriate Microsoft 365 licensing is required for certain Purview features. Access to Microsoft 365 administration, data classification input, and stakeholder availability is required. Outputs reflect agreed objectives and the environment at the time of delivery.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
