DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Microsoft 365 Tenant to Tenant Migration service helps organisations merge multiple Microsoft 365 tenants into a single environment. We plan and deliver controlled migrations that protect data, minimise disruption, and support unified collaboration all within a fixed price project.

Service Details

The Microsoft 365 Tenant to Tenant Migration service is designed to support organisations consolidating two or more Microsoft 365 tenants into one. This is commonly required following organisational change such as mergers, restructures, or shared service initiatives.

Valto works with stakeholders to understand objectives, constraints, and timelines. We assess source and target tenants, identities, domains, workloads, and dependencies to define a clear migration approach aligned to business needs.

We plan and execute migrations across Microsoft 365 workloads such as Exchange Online, SharePoint, OneDrive, Teams, and identity where required. Migration activities are sequenced to minimise disruption while maintaining security, access, and service continuity.

Following migration, Valto supports validation, optimisation, and next steps. This ensures users can collaborate effectively in the consolidated tenant and that the new environment is ready for long-term operation.

Service features

- Tenant consolidation planning and discovery
- Assessment of source and target tenants
- Identity and domain migration support
- Exchange Online mailbox migration
- SharePoint and OneDrive content migration
- Microsoft Teams migration planning
- Permissions and access validation
- Migration tooling and execution management
- User communication and change guidance
- Post-migration validation and optimisation

Service benefits

- Enables consolidation into a single tenant
- Reduces complexity across Microsoft 365
- Improves collaboration across organisations
- Maintains security and access control
- Minimises disruption during migration
- Protects data integrity throughout transition
- Simplifies long-term tenant management
- Supports organisational change initiatives
- Improves return on Microsoft 365 investment
- Provides a controlled, predictable migration

Service constraints

The Microsoft 365 Tenant to Tenant Migration service is typically delivered remotely but can be delivered onsite by agreement. Migration scope and timelines depend on the number of tenants, workloads, and data volumes involved. Access to all source and target tenants, appropriate permissions, and stakeholder availability is required. Some Microsoft 365 features have limitations during tenant consolidation that may affect sequencing and approach.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
