Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Email Migration to Microsoft 365 service helps organisations securely migrate email to Exchange Online. We plan and deliver controlled migrations that minimise disruption, protect data, and ensure users can work effectively from day one all through a fixed price project.

Service Details

The Email Migration to Microsoft 365 service is designed to support organisations moving from legacy email platforms to Exchange Online. Valto works with stakeholders to understand objectives, timelines, and risks before defining a clear migration approach.

We assess existing email environments, mailboxes, permissions, and dependencies to ensure a smooth and secure migration. This includes planning coexistence, migration batches, and user communication to minimise business disruption.

Migrations are delivered using proven tools and best practices. We manage mailbox moves, validate data integrity, and support cutover activities to ensure email access, calendars, and contacts function correctly throughout the transition.

Following migration, Valto provides guidance on optimisation and next steps. This ensures organisations can take full advantage of Exchange Online features and operate confidently within Microsoft 365.

Service features

- Email migration planning and discovery
- Assessment of existing email platforms
- Exchange Online mailbox migration
- Coexistence and cutover management
- Permissions and access validation
- Data integrity and quality checks
- User communication and support guidance
- Migration tooling and execution management
- Post-migration validation and testing
- Optimisation and next step recommendations

Service benefits

- Minimises disruption during email migration
- Protects email data and integrity
- Ensures reliable access to email services
- Improves security and resilience
- Supports smooth user transition
- Reduces risk during platform change
- Enables use of Exchange Online features
- Improves email availability and performance
- Simplifies long-term email management
- Aligns email with Microsoft 365 strategy

Service constraints

The Email Migration to Microsoft 365 service is typically delivered remotely but can be delivered onsite by agreement. Migration timelines and approach depend on mailbox volumes, source platform, and network constraints. Access to source email systems, Microsoft 365 tenant administration, and stakeholder availability is required. Legacy platform limitations may impact migration options and sequencing.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
