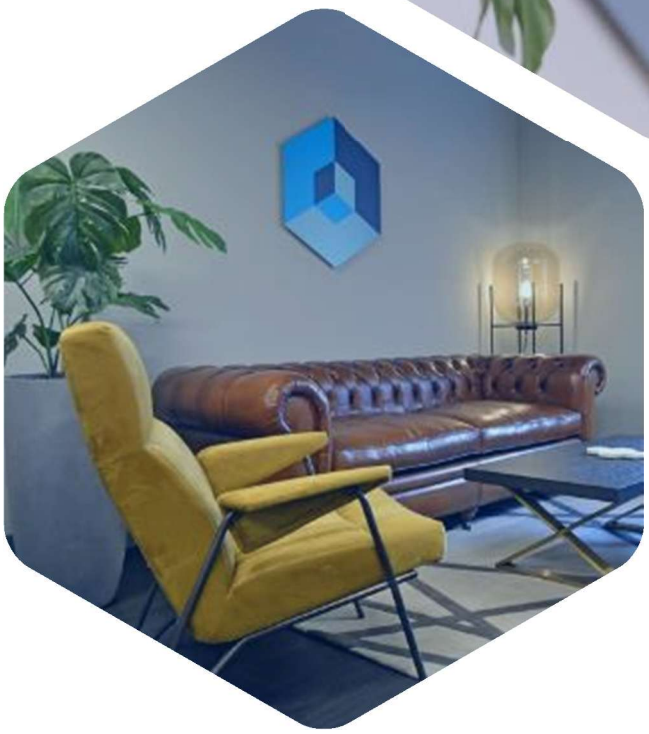
Valto

Intune Scoping Workshop

G-Cloud 15 Service Description



Valto

Valto build the intelligent workplace of the future

Powered by Microsoft

Microsoft 365 · SharePoint · Power Apps · Teams · Azure · Intune · Copilot · Viva

Valto is a Microsoft specialist committed to helping customers get more from Microsoft.

As a Microsoft Solutions Partner, we are experts in Microsoft Technologies including Modern Workplace, Microsoft 365, Azure, Business Applications, Data & AI.

One of our primary goals is to help "Change the World" by Impacting 1 million lives positively through social initiatives and working with non-profits.

Our Vision

- Best place to work
- Biggest and best projects
- Happiest Customers
- Change the World
- Best Culture
- Best Talent

MODERN WORKPLACE

DEVELOPING INTRANET, DOCUMENT MANAGEMENT AND HYBRID WAYS OF WORKING SOLUTIONS USING MICROSOFT TEAMS, SHAREPOINT, VIVA, AND OTHER MICROSOFT 365 SERVICES

MICROSOFT 365 & AZURE

ASSISTING ORGANISATIONS MANAGING DEVICES INCLUDING DESKTOPS / MOBILES AND MIGRATING TRADITIONAL SERVERS INFRASTRUCTURE TO THE AZURE PUBLIC CLOUD

BUSINESS APPLICATIONS

PROVIDING DEVELOPMENT SOLUTIONS AROUND THE MICROSOFT POWER PLATFORM INCLUDING POWER APPS, POWER BI AND POWER AUTOMATE

DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Intune Scoping Workshop helps organisations define a clear, delivery-ready scope for Microsoft Intune. Through detailed discovery and expert consultancy, we translate device management, security, and compliance needs into a structured implementation scope that is fixed priced.

Service Details

The Intune Scoping Workshop is a structured engagement designed to move from high-level device management goals to a clearly defined Intune delivery scope. Valto works with business and technical stakeholders to understand requirements, constraints, user profiles, and success criteria.

During the workshop, we explore Microsoft Intune capabilities across device management, application management, security baselines, compliance policies, and identity integration. We assess current device estates, operating systems, user scenarios, and security requirements to ensure the scope is realistic and aligned to organisational standards.

The session focuses on defining what is in scope and out of scope, identifying dependencies and risks, and agreeing priorities. This reduces ambiguity and supports accurate planning before deployment begins.

Following the workshop, Valto produces a documented scope covering requirements, assumptions, risks, and a recommended delivery approach. This output supports internal planning, procurement, or a fixed scope Intune implementation engagement.

Service features

- Microsoft Intune consultancy discovery workshops
- Device and application management services scoping
- Windows, iOS, and Android management assessment
- Security baseline and compliance policy scoping
- Identity and access integration services review
- App protection and configuration policy definition
- In-scope and out-of-scope documentation
- Dependency and risk identification consultancy
- Delivery approach and phasing recommendations
- Documented Intune scope and consultancy outputs

Service benefits

- Provides a clear Intune implementation scope
- Reduces delivery risk through expert consultancy
- Improves accuracy of Intune delivery estimates
- Aligns stakeholders with device management services
- Strengthens security and compliance planning
- Supports informed endpoint management decisions
- Accelerates readiness for Intune deployment
- Reduces rework during implementation
- Maximises value from Intune consultancy services
- Enables confident decision-making for endpoint projects

Service constraints

Access to relevant stakeholders, device estate information, and identity documentation is required. Outputs are advisory and form the basis for delivery planning or implementation services rather than deployed Intune configurations.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
