- Change the World
- Best Culture
- Best Talent

MODERN WORKPLACE

DEVELOPING INTRANET, DOCUMENT MANAGEMENT AND HYBRID WAYS OF WORKING SOLUTIONS USING MICROSOFT TEAMS, SHAREPOINT, VIVA, AND OTHER MICROSOFT 365 SERVICES

MICROSOFT 365 & AZURE

ASSISTING ORGANISATIONS MANAGING DEVICES INCLUDING DESKTOPS / MOBILES AND MIGRATING TRADITIONAL SERVERS INFRASTRUCTURE TO THE AZURE PUBLIC CLOUD

BUSINESS APPLICATIONS

PROVIDING DEVELOPMENT SOLUTIONS AROUND THE MICROSOFT POWER PLATFORM INCLUDING POWER APPS, POWER BI AND POWER AUTOMATE

DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Power Apps Development service designs and builds secure, scalable applications that improve business processes. We deliver tailored low-code solutions using Power Apps, SharePoint and Dataverse to increase efficiency, usability, and long-term value to a fixed cost.

Service Details

The Power Apps Development service is designed to help organisations create custom applications that solve real business challenges. Valto works with stakeholders to understand requirements, users, and success measures before development begins.

We design and build Power Apps solutions using canvas or model-driven apps, supported by Dataverse and integrations with Microsoft 365 and other systems. Best practices are applied to ensure security, performance, and maintainability.

Our delivery approach is iterative and collaborative. We validate solutions with users throughout development, ensuring apps are intuitive, effective, and aligned with business processes.

Following development, Valto provides documentation, knowledge transfer, and recommendations for future enhancement. Ongoing support and additional development can be provided as business needs evolve.

Service features

- Power Apps canvas and model-driven app development
- Dataverse design and configuration
- Integration with Microsoft 365 and systems
- Workflow and automation implementation
- Security and role-based access configuration
- User experience and usability optimisation
- Testing and quality assurance
- Stakeholder review and iteration cycles
- Documentation and knowledge transfer
- Ongoing enhancement options

Service benefits

- Improves efficiency through tailored applications
- Reduces reliance on manual processes
- Delivers scalable and maintainable solutions
- Improves user experience and adoption
- Aligns applications with business objectives
- Supports secure data management
- Accelerates low-code delivery timelines
- Improves return on Power Apps investment
- Enables future application expansion
- Supports digital transformation initiatives

Service constraints

The service focuses on application development and does not include ongoing support unless separately agreed. Access to Power Platform environments, Dataverse, required data sources, and stakeholder availability is required. Delivery timelines depend on scope, complexity, and data readiness.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
