Rimini Smart Path™

Rimini Explorer Pack™ for Agentic AI ERP

Deliver initial AI-led value in weeks – not years!

KEY BENEFITS

- Faster AI-led Innovation delivery, orchestrated with your existing ERP.
- No prerequisites or continued upgrades or migrations of ERP needed.
- Within 30 days of order, Rimini Street will complete the design, development and delivery of a demo process automation
- For 60 days after delivery, you'll be able to operate the demo transaction and capabilities, and complete a successful "Proof of Value" assessment of the solution
- You will understand the speed to value of Rimini Smart Path™ "self-funded innovation" for Agentic AI ERP!

Jump Start Your AI Journey with Rimini Street!

The Rimini Explorer Pack for Agentic AI ERP gets you started on your process automation and AI journey - without any of the risk, big budget investment and commitment usually associated with transformation and innovation projects.

With this "turnkey," fixed-fee demo package, you can quickly deploy a transaction automation demo and learn how processes can be automated with AI and deployed quickly for use - all while delivering ultra-fast ROI in just weeks!

Rimini Street will deploy a specific Agentic AI ERP transaction sample with your preferred AI workflow orchestration platform, or via our Preferred Partner, the ServiceNow®, AI platform. We will do this by installing the AI orchestration layer across the top of your existing ERP (such as SAP ECC 6.0 or Oracle EBS 11.5) and other enterprise software, with no prerequisite or future upgrades or migrations needed.

Get full enterprise-wide visibility, executive-level dashboards and operational workspaces that support better-informed, real-time decision making – improving your ability to run your organization.

Together, we'll identify and select your initial demo transaction and design and deploy your first automated business process - demonstrating the power of Agentic AI ERP. This is a 90-day Proof of Value demo package with 90-day software licenses, if the ServiceNow AI Platform is preferred.

What the Rimini Explorer Pack includes:

Agentic AI ERP Design Session and Value Analysis

The project starts with an architectural and technology roadmapping session led by a Rimini Street Enterprise Architect. Incorporating your AI workflow orchestration platform, we identify top ERP transactions that can deliver value leveraging workflow, automation, AI and exceptional, modern user experiences.

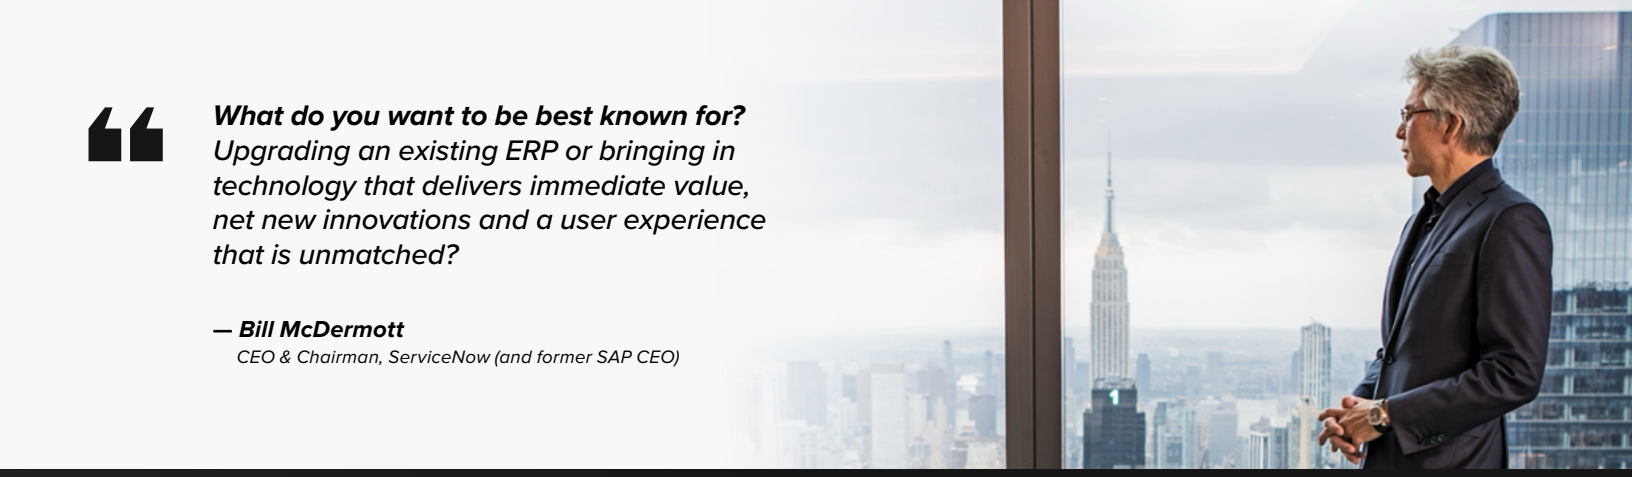
Proof of Value Demo Transaction

In 30 days, you will receive a "turnkey" demo based on the initial agreed-upon process. Available for an additional 60 days thereafter to use, evaluate and explore the technology, the entire experience is set at a fixed-fee.

Business Case and Innovation Roadmap

We will work together to craft a plan to deliver continuous "self-funded" innovation within existing budgets and produce a business case that explains the power and value of the investment.

Rimini Street



> ***What do you want to be best known for?*** *Upgrading an existing ERP or bringing in technology that delivers immediate value, net new innovations and a user experience that is unmatched?*

Rimini Smart Path™ Innovation Solutions

Explorer Pack for Agentic AI ERP

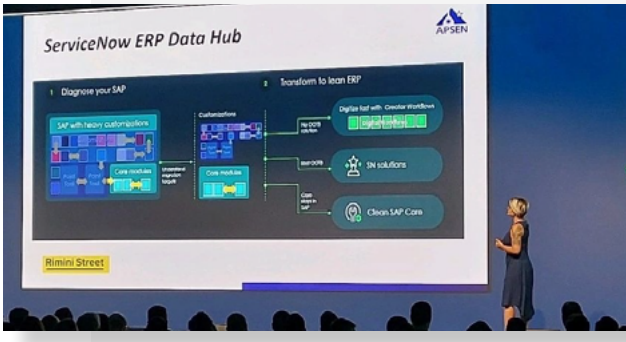
As an expert in ERP support and optimization solutions, Rimini Street is leading the way toward Agentic AI ERP. In doing so, we provide a set of expert-led innovation services on top of your existing ERP solution, which modernizes your experiences and automates workflows and tasks. Rimini Street is also a ServiceNow ERP modernization partner.

Leading organizations are accelerating their AI innovation and improving business results

Rimini Street | APSEN

Apsen Farmacêutica, a leading Brazil-based healthcare and pharmaceutical company, runs SAP ECC 6.0 and previously relied on heavy manual workflows – which increased their costs and drove lengthy development cycles for technology changes and new healthcare innovations. Instead of spending on a costly and low ROI ERP migration, Apsen invested in technology and innovation.

Apsen partnered with Rimini Street to implement and leverage the ServiceNow AI Platform, automating 70% of processes that previously required heavy manual intervention. Ultra-fast development and deployment cycles delivered innovation, labor savings and cost savings in a matter of weeks after initial deployment – with no ERP migration needed to access and leverage the latest innovations and technology. Apsen also reduced dependency on highly specialized teams, fueling autonomy and savings across the organization.



Apsen executive takes center stage to share how the Rimini Street and ServiceNow innovation helped to reduce 70% of their manual processes and deliver enterprise-wide efficiency.
