1 Introduction

1.1 Purpose

This service definition is designed to provide a high-level overview of Orchestrato's **Generative AI Skills Assessments & Training Workshops** for G-Cloud15. If you have any questions, please contact us on g-cloud@orchestrato.com .

1.2 Overview of Orchestrato

Orchestrato Ltd (trading as "Orchestrato") was founded in 2013 as a professional services consultancy to support organisations large & small with the migration to Cloud and optimising performance within Cloud, by helping address the challenges faced with people, process & the new technologies.

1.3 Our People

Our people have supported a multitude of projects in both the public and private sector and are passionate about delivering tangible outcomes that help our customers prosper.

They have also worked, either directly or indirectly via a Prime Contractor, with the Home Office, Crown Prosecution Service, Insolvency Service and MoD, and are members of the Vivace community who work across a range of government customers through the Home Office's Accelerated Capability Environment.

1.4 Our Services

We offer a range of specialist services via a diverse team of security cleared professionals:

2 Generative AI Skills Assessments & Training Workshops

2.1 Service Summary

Orchestrato's Generative AI Skills Assessment & Training Workshops rapidly build practical, safe capability across public sector teams. We combine skills-baseline assessment with hands-on, scenario-based learning to help staff understand, apply and govern Generative AI responsibly, focusing on real-world use, ethical and regulatory alignment, and measurable gains in confidence and productivity.

2.2 Service Features

- **Skills Baseline & Training Needs Analysis -** Identifies current AI understanding, strengths and gaps, and maps required capability uplift using clear metrics.
- **Role-Aligned Learning Pathways -** AI fundamentals, prompt-crafting, applied productivity use-cases, and advanced practitioner sessions tailored for operational teams, leadership and technical roles.
- **Hands-On Generative AI Workshops -** Practical exercises and guided labs focused on applying AI safely within daily tasks, with a strong emphasis on experiential learning and "learn by doing."
- **Ethical, Responsible & Compliant AI Modules -** Training on data ethics, responsible implementation, GDPR/UK GDPR considerations, and governance aligned to organisational and government values.
- **Content, Accessibility & User-Focused AI Application -** Guidance on creating AI-optimised content consistent with GDS and WCAG standards to ensure inclusive, compliant outputs.
- **Customisable Training Assets & Scenarios -** Sector-specific examples, tailored materials and adjustable content to reflect your department's workflows, risk profile and user needs.
- **Train-the-Trainer Enablement -** Capability transfer that supports sustainable, in-house adoption and reduces reliance on external resource.

2.3 Service Benefits

- **Improved AI Awareness & Confidence -** Measurable uplift in staff understanding of AI risks, opportunities, and application within their workflows.
- **Faster, Safer Adoption of Generative AI -** Hands-on workshops accelerate learning while reinforcing responsible behaviours, reducing organisational risk.
- **Operational Efficiency & Reduced Manual Effort -** Practical training on AI-driven content creation and automation improves productivity and reduces repetitive work.
- **Stronger Compliance & Governance Alignment -** Embeds ethical, transparent and compliant use of AI aligned to GDPR/UK GDPR, organisational values, and sector duties.
- **Clear Use-Case Identification & Prioritisation -** Supports discovery of high-value AI applications and helps build business cases for responsible scaling.
- **Inclusive Service Delivery -** Ensures AI-generated outputs consider accessibility, user needs and digital inclusion standards.
- **Sustainable Internal Capability -** With train-the-trainer support and reusable learning assets, organisations gain lasting capability beyond initial workshops.

3 Clearances & Security

The majority of our resources either hold SC or DV security clearances, and at the very minimum have been BPSS checked.

As a company, Orchestrato is Cyber Essentials certified and our Information Security Policy and wider policies align with the National Cyber Security Centre (NCSC) guidelines and industry best practice.

4 Engagement

4.1 Order Process

All customers are appointed a Service Manager and Project Manager, and where appropriate technical SME support.

This team will work closely with the customer, and any associated / key stakeholders, to define the scope of works, deliverables, timescales, and investment required to deliver the customer's desired outcomes. This in turn will be used to structure and agree a G-Cloud order form, in accordance with the Digital Marketplace supplier assessment and contract award process.

4.2 Onboarding

Orchestrato believe strongly in the benefits to the customer of a thorough On- and Off- boarding process.

As a business we pride ourselves in the amount of time and effort we invest in understanding our customer (and any wider stakeholders) needs and priorities, to ensure that we deliver to time, cost and quality.

Once the contract has been awarded, we will invite the customer to a kick-off / mobilisation meeting to establish the high-level priorities, activities, and ways of working to ensure we can achieve the best possible outcome(s).

This will be followed by a detailed project planning session, tailored to meet the customers' requirements, where we would agree the preferred delivery methodology and cadence of reporting.

Finally, your appointed Service Manager will agree the governance and oversight necessary to ensure delivery and customer satisfaction.

4.3 Performance, Ongoing Support and Service Constraints

As a professional services provider, Orchestrato will look to agree the levels of support at project inception, the levels of which may be reviewed later at the customer's request and amended via formal change request.

All service performance reviews will be conducted with your appointed Delivery / Project Manager, and escalated if necessary to your appointed Service Manager.

All roles within the service, will be clearly defined at outset and named resources advised formally in writing (including all contact information) to the customer directly following the kick-off meeting.

Standard response times to any issues will be one working day during our normal working hours, which are 8.30 a.m. to 5.30 p.m. Monday to Friday.

Any service constraints will be defined and agreed with the customer at outset.

4.4 Offboarding

On all professional services support services, Orchestrato always look to close down each service with a thorough retrospective and written report. As data back-up, disaster recovery and restoration are not core to this service, any activities in these regards would be planned and agreed on a project by project basis.

Orchestrato's Disaster Recovery & Business Continuity Plan is available on request.

5 Additional Information

5.1 Service Pricing

All pricing for this service is based on Orchestrato's G-Cloud15 rate card, which is on the Digital Marketplace.

To assist with pricing this service, we would expect a typical service wrap to include the following:

- Service Manager: 1 day per month
- Delivery / Project Manager: Minimum 1 day per week (dependent on size of project)

5.2 Invoicing

Invoicing will be raised monthly, on 30-day payment terms
