Microsoft

Accelerate Innovation with Low Code

Industry Solutions Delivery

Digital Demand and Developer Shortfall: The demand for new apps and processes is unprecedented, with over 750M apps expected in the next 3 years, surpassing the last 40 years combined. A developer shortfall of 4M necessitates low code platforms to empower everyone to build applications for digital transformation

Microsoft Power Platform: Adopting the Microsoft Power Platform enables digital transformation to engage customers, empower employees, transform products, and optimize operations. Accelerate transformation with low code to address pain points and provide tangible business outcomes

Outcomes

Provide superior products and services

Deliver stable, scalable, and secure enterprise platforms to empower organizations with superior products. Ensure timely delivery aligned with goals.

Enable a highly productive workforce

Automate routine tasks to save time and effort, enabling teams to focus on higher-value work. Prevent maintenance-related downtime and scale systems to meet growing demand

Increase Financial Performance

Drive growth and profitability by embracing innovation, optimizing assets, and creating new revenue streams. Reduce total cost of ownership and increase ROI to maximize business value.

Capabilities and Offer Overview

The Accelerate Innovation with Low Code offering provides organizations the opportunity to identify and implement specific high-value Power Platform use cases in their landscape to address one or more specific pain points and provide tangible business outcomes. This offering will accelerate your Power Platform innovation journey giving your line-of-business end-users access to modern, highly configurable and intelligent business applications. Tangible examples of this are areas where high value Power Platform use cases can be implemented to accelerate innovation through the Microsoft Power Platform .

Strong focus on business outcomes

Agile implementation of high-value Power Platform use cases

No/low code approach and agility are key
