Dynamic

Introduction

The Dynamic LMS is an enhanced version of the Moodle open-source platform and is provided fully branded and configured with all functions provided as standard (the client simply switches off functions that are not currently required). We provide The LMS as a software as a service (SaaS) – a cloud based virtual server environment including a managed firewall, intelligent back-up and proactive uptime monitoring on fully maintained servers. If required, we can provide the LMS for on-premises hosting on the client's own server infrastructure.

What's included as standard

- An upfront cost starting at £15,000 is required for the deployment of the Dynamic LMS and this includes all Dynamic plug-ins, organisation branding, design, configuration and project management. The final cost depends on which additional services are required.
- The annual cost shown in the table below is based on the total number of individual users who have access to the LMS platform as an active user.
- All functionality is supplied as standard, this includes eLearning and Classroom Session Management, Appraisals, Recognition (peer-to-peer), Talent Management, Coaching, 360-Degree Feedback, Competencies (standard and advanced)
- Automated groups and group managers are created for you (based on suitable HR system data available on user accounts)
- HTTPS security certification and SFTP secure transfer of data is included as standard.
- Annual maintenance and support includes the release of new features, security patches and fixes and support desk (telephone and e-mail) access for nominated client personnel.
- Administrator training is included at initial deployment.

The pricing levels

Users not exceeding	1,000	5,000	10,000	20,000	40,000	70,000	> 70,000
Storage provided	30GB	40GB	50GB	60GB	80GB	100GB	TBC
Total cost (per annum)	£9,000	£15,000	£20,000	£29,000	£45,000	£60,000	Contact Dynamic
Representative cost per user	£9	£3	£2	£1.45	£1.13	£0.86	

Additional services

The following additional services can be provided and will be priced on a case-by-case basis:

- Set up of courses from a legacy training system.
- Import of historical user training records from a legacy training system.
- Automated import of user data from a client HR system and/or single sign-on user authentication or synchronisation via a directory service.
- Automated export of user data for populating a client system.
- A multiple language LMS based on a user's regional profile setting.
- An e-commerce content managed web site integrated with the LMS platform allowing for a wide variety of methods for selling access to on-line courses.
- Any other integration with external systems.
