## 1 Service Description

A fractional FinOps operations service providing ongoing governance and optimisation of Azure cloud spend. Delivers continuous monitoring, cost control, and optimisation activities without requiring full-time cloud financial management resources.

## 2 About Our Service

This service provides fractional access to FinOps specialists supporting the ongoing operation of Azure cost management practices. It ensures continuous cost visibility, optimisation, and governance across Azure subscriptions while aligning spend to business and service priorities.

## 3 Service Features

- Fractional FinOps operational support
- Continuous Azure cost monitoring
- Budget tracking and variance analysis
- Reserved Instance and Savings Plan management
- Cost anomaly detection and investigation
- Cost allocation and chargeback support
- Governance policy implementation
- Monthly cost optimisation reporting
- Stakeholder cost review sessions
- Knowledge transfer and documentation

## 4 Service Benefits

- Ongoing Azure cost control without full-time staff
- Predictable and transparent FinOps costs
- Improved budget adherence
- Reduced risk of cloud overspend
- Continuous cost optimisation
- Clear accountability for cloud spend
- Supports multi-subscription Azure estates
- Complements Azure cloud operations
- Scalable FinOps support model
- Confidence in long-term cloud cost governance
