BUSINESS APPLICATIONS

PROVIDING DEVELOPMENT SOLUTIONS AROUND THE MICROSOFT POWER PLATFORM INCLUDING POWER APPS, POWER BI AND POWER AUTOMATE

DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Power BI Development service delivers high-quality dashboards and reports tailored to business needs. We design, build, and optimise Power BI solutions that provide trusted insights, improve decision-making, and align reporting with organisational objectives all on a fixed cost.

Service Details

The Power BI Development service is designed to help organisations create effective, reliable, and scalable Power BI solutions. Valto works with stakeholders to understand reporting requirements, data sources, and success measures before development begins.

We design and build Power BI reports, dashboards, and data models using best practices for performance, security, and usability. This includes data modelling, DAX development, visual design, and optimisation to ensure insights are accurate and easy to interpret.

Our approach focuses on delivering reports that support real business decisions. We work iteratively with stakeholders to validate outputs, refine visuals, and ensure reporting aligns with how teams consume and act on data.

Following development, Valto provides documentation, knowledge transfer, and recommendations for future enhancement. Ongoing support and additional development can be provided as business needs evolve.

Service features

- Power BI report and dashboard development
- Data modelling and DAX development
- Integration with multiple data sources
- Performance and scalability optimisation
- Security and access configuration
- Visual design and usability optimisation
- Stakeholder review and iteration cycles
- Testing and quality assurance
- Documentation and knowledge transfer
- Ongoing enhancement options

Service benefits

- Delivers trusted, actionable business insights
- Improves decision-making through clear reporting
- Reduces reliance on manual data processes
- Improves consistency across reports
- Ensures scalable and maintainable solutions
- Enhances user engagement with data
- Supports secure access to information
- Aligns reporting with business objectives
- Improves return on analytics investment
- Enables future reporting expansion

Service constraints

Access to required data sources, Power BI environments, and stakeholder availability is required. Delivery timelines depend on scope, complexity, and data readiness.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
