Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary
Valto's Fabric Envisioning Workshop helps organisations define how Microsoft Fabric can support data, analytics, and reporting goals. Through structured discovery and expert guidance, we identify high-value use cases and create a clear roadmap for adopting a unified analytics platform.

Service Details
The Fabric Envisioning Workshop is a structured engagement designed to help organisations understand how Microsoft Fabric can meet their data and analytics objectives. Valto works with key stakeholders to explore current challenges, data maturity, and desired outcomes.
During the workshop, we review existing data sources, reporting approaches, and analytics tools. We explore Microsoft Fabric capabilities including data ingestion, lakehouse architecture, analytics, and reporting to identify where Fabric can simplify and improve current processes.
The session combines facilitated discussions, practical examples, and real-world scenarios. This enables stakeholders to identify high-impact use cases, understand architectural considerations, and make informed decisions before committing to implementation.
Following the workshop, Valto provides documented recommendations, priorities, and next steps. This includes a clear roadmap covering adoption approach, skills considerations, and phased delivery aligned to business goals.

Service features
- Stakeholder discovery and facilitated workshops
- Microsoft Fabric capability overview
- Review of current data and analytics landscape
- Use-case identification across departments
- Data architecture and platform considerations
- Integration with Microsoft data services
- Reporting and analytics approach guidance
- Prioritisation of high-value opportunities
- Adoption and skills planning advice
- Documented recommendations and roadmap

Service benefits
- Aligns analytics strategy with business objectives
- Clarifies how Fabric can deliver value
- Reduces complexity across data platforms
- Improves decision-making through better insights
- Identifies quick wins and strategic use cases
- Supports informed investment decisions
- Accelerates analytics platform planning
- Improves data visibility and consistency
- Provides a clear adoption roadmap
- Maximises value from Microsoft Fabric

Service constraints
Access to relevant stakeholders, data documentation, and existing analytics outputs is required. Outputs are advisory and do not include platform configuration or deployment unless separately agreed.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
