### DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

### MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

# Microsoft Solutions Partners

## Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

## Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

# Service Description

**Summary**
Valto's Fabric Setup and Deployment service implements Microsoft Fabric to deliver a secure, scalable analytics platform on a fixed priced project. Our consultants deploy, configure, and validate Fabric services to unify data, analytics, and reporting aligned to business objectives.

---

**Service Details**
The Fabric Setup and Deployment service is designed to help organisations move from planning to a production-ready Microsoft Fabric environment. Valto works with stakeholders to confirm objectives, data sources, security requirements, and success measures before deployment begins.
Our Fabric consultancy deploys and configures core Fabric services including data ingestion, lakehouse architecture, modelling, and analytics. We align setup with governance, security, and identity requirements, integrating with Microsoft 365, Power BI, and existing data platforms.
Deployment follows Microsoft best practices to ensure reliability, performance, and scalability. We validate configurations, test data pipelines and reports, and ensure the environment is ready for operational use.
Following deployment, Valto provides documentation, knowledge transfer, and recommendations for optimisation and next steps. Ongoing Fabric consultancy and data services can be provided to support continuous improvement.

---

**Service features**
- Microsoft Fabric setup and deployment consultancy
- Fabric data platform configuration services
- Data ingestion and pipeline deployment services
- Lakehouse and semantic model setup
- Security, governance, and identity configuration
- Integration with Power BI and Microsoft services
- Performance tuning and validation services
- Testing and deployment assurance consultancy
- Documentation and knowledge transfer services
- Ongoing Fabric consultancy support options

---

**Service benefits**
- Delivers a production-ready Fabric analytics platform
- Reduces risk through expert Fabric consultants
- Improves data reliability and accessibility
- Accelerates analytics delivery with Fabric services
- Aligns data platforms to business objectives
- Strengthens security and governance controls
- Improves scalability of analytics solutions
- Enables faster, better decision-making
- Maximises value from Fabric consultancy services
- Supports long-term data platform growth

---

**Service constraints**
The Fabric Setup and Deployment service is typically delivered remotely but can be delivered onsite by agreement. Appropriate Microsoft licensing is required. Access to data sources, Microsoft Fabric environments, and stakeholder availability is required. Deployment scope and timelines depend on data complexity and agreed requirements.

# Case Studies

## Chester Zoo Case Study

### Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

## City of London Case Study

### The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

## North Wales Fire and Rescue Services Case Study

### NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
