PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Power Pages Build service designs and delivers secure, scalable external websites and portals. We build Power Pages solutions that provide seamless user experiences, integrate with business data, and support efficient, compliant digital service delivery to a fixed price cost agreed at the start.

Service Details

The Power Pages Build service is designed to help organisations deliver external-facing websites and portals using Microsoft Power Pages. Valto works with stakeholders to understand user needs, service objectives, and data requirements before development begins.

We design and build Power Pages solutions integrated with Dataverse and Power Platform services. This includes user journeys, forms, data access, authentication, and role-based security, ensuring solutions are secure, usable, and aligned with organisational policies.

Our delivery approach is structured and iterative. We validate designs and functionality with stakeholders throughout the build to ensure the solution meets requirements, performs reliably, and provides a positive experience for external users.

Following build completion, Valto provides documentation, knowledge transfer, and recommendations for ongoing management and enhancement. Additional support and future development can be delivered as required.

Service features

- Power Pages website and portal build
- Dataverse data model and configuration
- External user journey and form design
- Authentication and role-based access setup
- Integration with Power Platform services
- Security and compliance configuration
- Testing and quality assurance
- Stakeholder review and iteration cycles
- Deployment and go-live support
- Documentation and knowledge transfer

Service benefits

- Delivers secure external digital services
- Improves experience for external users
- Reduces reliance on manual external processes
- Supports compliant data access
- Provides scalable and maintainable portals
- Aligns digital services with business objectives
- Accelerates delivery of external solutions
- Improves return on Power Pages investment
- Enables future service expansion
- Supports digital transformation initiatives

Service constraints

The Power Pages Build service is typically delivered remotely but can be delivered onsite by agreement. The service focuses on building Power Pages solutions and does not include ongoing content management or support unless separately agreed. Access to Power Pages environments, Dataverse, required data sources, and stakeholder availability is required. Delivery timelines depend on scope, complexity, and data readiness.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
