About

The Sword Professional Services Business Unit is focussed on Digitally Enabling organisations by ensuring their IT platform is fit for purpose and able to support modern ways of working as well as enabling the business to utilise digital services to better service customers and partners.

Sword have been a Microsoft Gold Partner for over 25 years and currently hold 8 Gold Competencies including, Cloud Productivity, Cloud Platform, Application Development and DevOps. Our Professional Services team are passionate about utilising our technology skills in these areas to help our customers develop compelling solutions that deliver genuine business value. Our Adoption and Business Consulting experts can also ensure our customers our driving cultural and behavioural change while reimagining the workplace and changing the way we work together, whilst also helping our customers make the right business decisions, modernising legacy processes, policies and ways of operating your services.

Digital Enablement Practice

Enterprise cloud specialists, enabling productivity, protecting your data and freeing up information and modern, collaborative working.
Our team of Microsoft Specialists will quickly establish your readiness and remediation pathway to Microsoft 365 across Networks, Devices, Applications, Identity and Access Management and Messaging and Collaboration workloads. Our Zero Trust Framework and Security & Compliance By Design approach is there to help organisations achieve the most out of their investment in Microsoft 365 and Azure while mitigating risk with necessary and proportionate controls for their environment.
We specialise in Information Governance and Compliance and our experts will design, plan and manage an Information Management programme to meet your organisations compliance standards while transitioning content stores to the M365 cloud with appropriate retention policies and enterprise search capabilities with user adoption in mind.
