Author	Version	Date	Status
Daemon Solutions Limited	1.0	10 May 2022	Framework Release for G-Cloud 13

1. Cloud Data Services Pricing

The following table provides Daemon Solution cloud services pricing. Please note that we offer 2% discount to educational institutions and charities on all of these prices.

Table 1: Cloud Data Services Pricing

Service ID	Service Offering Name	Key Offering Attributes	Minimum Price	Maximum Price
G13-001	Big data strategy definition	Big data strategy with special focus on data lake in AWS / Azure	£24,000.00	£24,000.00
G13-002	Big data architecture and roadmap	Big data architecture definition, gap analysis, roadmap definition, business case for each capability on the roadmap.	£51,000.00	£51,000.00
G13-003	Data Lake in Six Weeks	A fully functional data lake based in cloud ready to onboard business use cases.	£75,000.00	£75,000.00
G13-004	Cloud data lake – proof of concept	Basic data lake architecture, sample implementation of batch and stream ingestion, processing, analytics, consumption and lineage with metadata management	£51,000.00	£51,000.00
G13-005	Cloud Data Lake – Full services as described in the service description	Implementation of full data lake service as described in the service description, which includes: architecture, platform build on AWS or Azure, batch and real-time ingestion, processing, consumption, setup of metadata platform and application for lineage, 5 days training, migration of up to 15 Terabytes data, and many more as per 'in the scope section of the service description'.	£1,500,000.00	£1,500,000.00
G13-006	Minimum Viable Cloud Data Lake	Architecture, roadmap, implementation with batch ingestion, processing, and consumption platform for up to 1 Terabytes data.	£240,000.00	£240,000.00
G13-007	Small Cloud Data Lake	Architecture, roadmap, implementation with batch ingestion, processing, and consumption platform for up to 5 Terabytes data.	£330,000.00	£330,000.00
G13-008	Medium Cloud Data Lake	Architecture, roadmap, implementation with batch ingestion, processing, and consumption platform for up to 10 Terabytes data.	£450,000.00	£450,000.00
G13-009	Large Cloud Data Lake	Architecture, roadmap, implementation with batch ingestion, processing, and	£900,000.00	£900,000.00

Service ID	Service Offering Name	Key Offering Attributes	Minimum Price	Maximum Price
		consumption platform for up to 100 Terabytes data.		
G13-010	Minimum Viable Stream Cloud Data Lake – add on	Architecture, implementation with real-time stream ingestion, processing, and consumption platform for up to 50 records per second data.	£240,000.00	£240,000.00
G13-011	Small Stream Cloud Data Lake – add on	Architecture, implementation with stream ingestion, processing, and consumption platform for up to 200 records per second data.	£330,000.00	£330,000.00
G13-012	Medium Stream Cloud Data Lake – add on	Architecture, implementation with stream ingestion, processing, and consumption platform for up to 500 records per second data.	£430,000.00	£430,000.00
G13-013	Large Stream Cloud Data Lake – add on	Architecture, implementation with stream ingestion, processing, and consumption platform for up to 2000 records per second data.	£600,000.00	£600,000.00
G13-014	Metadata management and data lineage – add on	Architecture, implementation of metadata management with lineage bridge.	£440,000.00	£440,000.00
G13-015	Cloud Machine Learning and Artificial Intelligence Starter - Proof of Value	Identify your most compelling AI/ML use case and build your proof of value.	£10,000.00	£25,000.00
G13-016	Cloud Machine Learning and Artificial Intelligence Starter - Production Build	Take the proof of value and turn it into a best of practice production implementation and integration ready for the next use case.	£50,000.00	£400,000.00

2. Application Support Pricing

We offer competitive application support and operations. A quote can be obtained by submitting your requirements.

3. Platform Support Pricing

We offer competitive platform support and operations. A quote can be obtained by submitting your requirements.

4. Discounts

If both the application and platform support is ordered from us then we offer 2% discount on the support price. Both the support order must belong to the same SLA class e.g. if the application support is 'Business Critical' then platform support should also be 'Business Critical' to be eligible for this discount. The educational institutions and charities may maximum achieve 2% discount under this arrangement.
