G-Cloud 15 Support

Published by	**Craig Godwin, Managing Director**
Version	**2.0**
Issue Date	**January 2026**

Introduction

Understanding the social housing market and how GIS mapping can benefit organisations is an expertise that only comes from working within the industry for many years. ODCGIS offer unrivalled experience, having worked for over 120 social housing providers, from some of the smallest to some of the largest. Currently, 70 social housing providers have a GIS Managed Service, between them managing over 1,100,000 properties which represents over 25% of all social housing in the UK.

ODCGIS operate ESRI, Cadcorp, QGIS, MapInfo and GIS Cloud utilising whichever platform is best suited to a particular task. Irrespective of which GIS platform you have inhouse we can support your GIS team. Support is included as part of a Managed Service whereby you select the package that fits your requirements.

Support Packages

Each Managed Service package is tailored to meet the requirements of the customer. Factors taken into account include the number of properties the customer is responsible for, the area of their land registry boundaries, their budget, the number of users and how they will use the GIS.

Included In Package:

Consultancy Days
Project Management
Training
Account Management
System Administration
Software Updates
Phone Support Monday- Friday 9.00-5.00

Pricing

Managed Service Packages start at £2,500 and have a maximum of over £40,000

Pricing is based on a day rate of £800-£950 dependent on the number of days bought.

Prices exclude VAT

These prices are a guide only, please contact us to discuss your requirement and to get a bespoke proposal addressing your requirements.
