Kinetic

Challenges solved

• Reduce the administrative burden as our paperless system can help save time, allowing your team to focus on other key objectives.

• No more concerns about which student bedrooms are empty, as you can easily view your bedroom stock and occupancy in visual representations.

• Remove data duplication risks by integrating with registry, finance and other systems, meaning data is correct and up-to-date.

• With the ability to pull and schedule automated reports, you're no longer unsure of key trends within the student lifecycle.

• Improved communication between your team and the students with a fully audited correspondance, linked to each student's account.

KX STUDENT

A streamlined solution to help manage the student journey efficiently and successfully; from the initial application to departure, and everything in-between.

> Our portfolio has grown and diversified over the years and Kinetic have been supporting us to deliver a responsive service, which in turn enhanced the student experience. The student journey goes beyond the normal 9 - 5 business hours and we needed a system that would keep working 24/7. Thanks to Kx, we are able to deliver a quality service to our students, who are our number one priority.

Why KxStudent?

Improved student experience

Having one system to manage the student journey will allow you to stay up-to-date with each individual, and ensure they have a positive experience.

Flexible interfacing capabilities

Have your systems talk to each other by integrating your registry, financial, door access or even our StudentWeb solution, plus much more.

One centralised system

Manage your room moves, swaps and room damages from one system, for all your team to access.

Increased productivity

With the ability to manage arrivals and departures, as well as allocate students to bedrooms in bulk, your team can focus on key business objectives.

Business and operation benefits

Reduce incoming enquiries
Reduce unnecessary or repetitive student enquiries by mass emailing important information quickly and efficiently.

Enhance the student experience
Add online services that can manage student requests, parcel management, the induction process and room inspections and take the student experience to the next level.

Mass allocation
Save time and allocate students to their bedrooms in bulk whilst still taking their preferences into consideration.

Track the full journey
Track and audit the complete student lifecycle, from the initial application through to departure, with scheduled reporting and analysis that will help make future improvements.
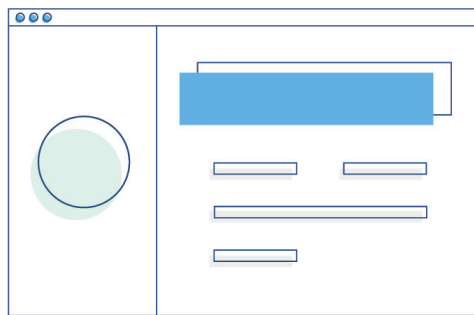

Simple financial management
From payments, charges and invoices, you can easily manage the financial elements and access user-friendly reports.

Reduce void risk
Stay up-to-date with your bedroom occupancy, so if a cancellation were to occur, you can react quickly.

Automated processes
Use the student allocation list to automate the creation of every student contract.

Pre-installation checklist

Unless you use KxHosting, the checklist includes:

1) Windows 2012 server 64-bit

2) Microsoft SQL server 2012, 2014 or 2016, 64-bit

3) Microsoft Windows 7, 8 or 10 professional

Complimentary Kx products

StudentWeb
Let students discover and apply for your accommodation and digitally sign contracts online.

KxInspections
Log and assign damages, take photos as evidence, manage inventory and charging, get students to digitally sign inspection reports and more.

KxParcels
Tackle increasing delivery volumes by swapping out slow paper-based processes for an automated, engaging and intuitive digital system.

KxInductions
An online portal where students can prepare for arrival with access to various induction documents.

KxRequests
Allow your students to make requests via their online hub.
