AskAI
For Procurement

Microsoft CFO AWARD
FY25 Q1

Optimizing traditionally manual processes and improving purchasing efficiency by using Microsoft Fabric in tandem with Azure OpenAI GPT to drive intelligent search and automation functionality.

Key Benefits

Improved Productivity
Quickly summarize lengthy contracts and highlight key terms and clauses

Risk Reduction
Identify unfavorable terms that impact compliance, introducing risk

Clear Accountability
Capture supplier incident response obligations to establish urgency

Multilingual Support
Translate contracts to native languages to ensure clarity and alignment

Actionable Insights
Extract highly accurate information for targeted analytics

Return on Investment
Predictive models enable proactive mitigation strategies

AskAI for Procurement is an innovative approach to gather and consolidate data from procurement contracts to gain valuable insights, directly impacting efficiency.

85%
Reduction in steps per process

700 hrs
Manual time saved per month

"I loved hearing how the process improved from seven clicks to **just ONE prompt!"**

– **Amy Hood**
EVP and CFO Microsoft
