- Workflows and automatic notifications improve assessor experience and productivity.

Who we are

Analytics Engines are specialists in data integration, machine learning, AI, in-depth analytics and visualisations. We leverage connected technology and data analysis to deliver better insights and outcomes for customers. We are obsessive about data, dedicated to problem-solving and passionate about driving customer success.

Our solutions break down data silos and enable our customers to understand how, where and why their data is connected. We provide them with the resources they need to search, understand and act on their data.

We strive to deliver impactful change to our customers and the wider community through the responsible use of data. In September 2021, we were identified as one of the UK's leading scale-ups after being selected to join the Tech Nation Applied AI 3.0 cohort. Tech Nation also named Analytics Engines as one of the UK's AI Companies to watch.

Who we work with

Analytics Engines is a trusted partner to organisations across the public and private sector. Our solutions have helped support organisations in Healthcare, Finance, Government, Media, Technology, and Education.

We have developed solutions for organisations including the Department for Business, Energy & Industrial Strategy, Innovate UK, The National Gallery London, RTÉ, and the Northern Ireland Audit Office.

Do more with your data.

Not sure how data visualisation can support
your organisation?

Analytics Engines offer end-to-end guidance, consultation
and support in response to your data challenge.
