## **G-Cloud 13**

# **FourNet (4net) Fortinet Zero-Trust Network Access Control (NAC) and IoT Security**

## **Pricing Document**

**Framework reference: RM1557.13**

FourNet offers a myriad of features and functionality within this Service Offering.

It is prohibitive for us to try and list, and price, every feature, function and option available. Furthermore, during the lifetime of this G-Cloud Framework iteration, products and services will evolve and/or change, either with new and enhanced services or with the retirement of services.

FourNet offers G-Cloud services which are built around individual Buyer requirements, they are not a 'one size fits all' offering.

We undertake a 'no-cost' business engagement and discovery exercise to understand your business processes, objectives and capabilities. Once we fully understand the Scope of Requirements, we will provide a detailed proposal and pricing schedule, which will enable you to quickly and easily order the services you and your business needs.

As a guide our Service Offer Prices start at:

Costs start £3,100 per annum for the service

Please refer to the SFIA Rate Card for Professional Service day rates for the project management, design, configuration, implementation transition/migration and training.

For further details of our Service Offering, please contact our Public Sector Team on 0161 864 5130 or via e-mail, [publicsector@fournet.co.uk](mailto:publicsector@fournet.co.uk)
