

Source Code Control

**G-Cloud 13 Source Code Control Ltd
Rate Card**

Services and rates provided under G-Cloud 13

Service	Cost	Additional Costs
External Cybersecurity Threat Scanning	£10,950 per annum	£500 for 25 additional keywords
<p>A service which scans an organisation's domains from the outside and reports on vulnerabilities. In addition, the customer can provide keywords which are then compared with chatter on forums and on the dark web to attempt to pre-empt malicious acts.</p>		

Cloud Optimisation	6% of the customer's monthly Public Cloud bill, payable in arrears. (minimum commitment is 2 months).	
<p>The Source Code Control Cloud Optimisation service allows customers to take control of their Public Cloud spending, without the need to directly subscribe long term to a software tool, or indeed learn how to operate the software. The service will quickly identify areas where savings could be made, while still assuring good performance, and provide greater visibility into monthly spend across cloud services, and how that spend is growing.</p>		

Sustainability Assessment	£2950 per project	
<p>The Cloud Sustainability service from Source Code Control helps you to calculate the impact of adopting cloud services on your carbon footprint. We can help you benchmark your on-premises IT devices in terms of CO2 equivalent and then estimate the reduction / what that looks like in the cloud.</p>		

Beyond the service pricing our standard rates are as follows:

UK based	Senior consultant	£985 per day
UK based	Management consultant	£700 per day
UK based	Junior consultant	£500 per day
Offshore	support staff / processing / analytics	£375 per day

A full SFIA rate card is available on request.

All prices are exclusive of VAT.
