About Us

DLP is a specialist consultancy here to help you achieve your information security and privacy objectives.

We assist organisation's with projects involving DSP Toolkit, ISO 27001, Cyber Essentials, GDPR, PCI, Cyber Security, and Data Protection.

Over the years, DLP consultants have completed many successful projects for a wide range of clients including government clients, NHS departments, pharmaceutical manufacturers, financial clients and numerous others.

With a deep understanding of InfoSec and data protection, our consultants will work with you assessing your level of compliance, and then provide appropriate guidance and support to move the project forward.

How we can help you

Service Definition

Our extensive and deep knowledge of information security (and data protection) has been gained through working with a wide range of clients across several industries.

This means that we are able to offer constructive guidance on information security and privacy best practices, and how to keep these costs low, whilst minimising any potential disruption when striving to meet compliance requirements.

Process

Our projects typically run on the following lines:

- Sign a confidentiality agreement (either clients or ours)
- Organise an initial scoping meeting with the project sponsor so that we can develop an understanding of the client's organisation and IT infrastructure.
- Agree what work will be completed in the scope of work
- Identify what client staff will be contacted as part of the project
- Determine staff availability and agree the project schedule
- Run project (and/or meetings) and gather evidence
- Analyse findings
- Write report incorporating recommendations and areas of potential improvement
- Issue final report
- Hold debrief meeting with client (if required) to discuss findings and results and record the key lessons learned

Case Studies

Case 1

DLP consultants managed the information security function of a London based European Union (EU) agency for over 5 years.

The DLP team provided onsite support and guidance on a wide range of information security issues including attending inter-country EU meetings and providing input to discussions with various international agencies and NGO's.

Case 3

Assisting a NHS department with several aspects of their IG Toolkit submission.

Project included the selection and evaluation of several security vendor products to meet client requirements.

Case 2

Major bank reviewing their information security controls and their alignment with ISO 27001.

The project involved a review of documentation and related processes to determine gaps and potential areas for better alignment with the ISO 27001 standard.

Case 4

Healthcare diagnostic company requiring help and assistance to make their DSP Toolkit submission.

Project included the establishment of a governance programme aligned with the DSP standards utilising a Governance, Risk and Compliance system to automate many of the routine compliance tasks.
