Cyber Security Consultancy Services

## Virtual CISO – Service Definition

The Somniac Security Team are highly experienced Cyber Security experts who can provide you with a dedicated & named individual. Depending on your requirements, we can provide the service on a part-time, fulltime or interim basis.

Your dedicated Virtual CISO will have all the key skills required to perform the CISO role for your organisation, therefore they are able to provide leadership for your internal team alongside working with the wider organisation management teams. You will be able to immediately benefit from our extensive experience across government, financial services and other industry verticals.

Our independence and UK centric knowledge allow our team of experts to provide unbiased guidance and consulting that is highly relevant to UK government organisations.
