What is Application Assessment?

Atos Application Assessment offers an innovative approach for rapid cloud assessment and design to help enterprises quickly assess, transform, develop, and design best-in-class cloud-native applications. Leveraging the Atos Cloud Assessment Tool for a "best fit" discovery, assessment, and transformation strategy, enterprises can realize the benefits of their cloud transformation journey.
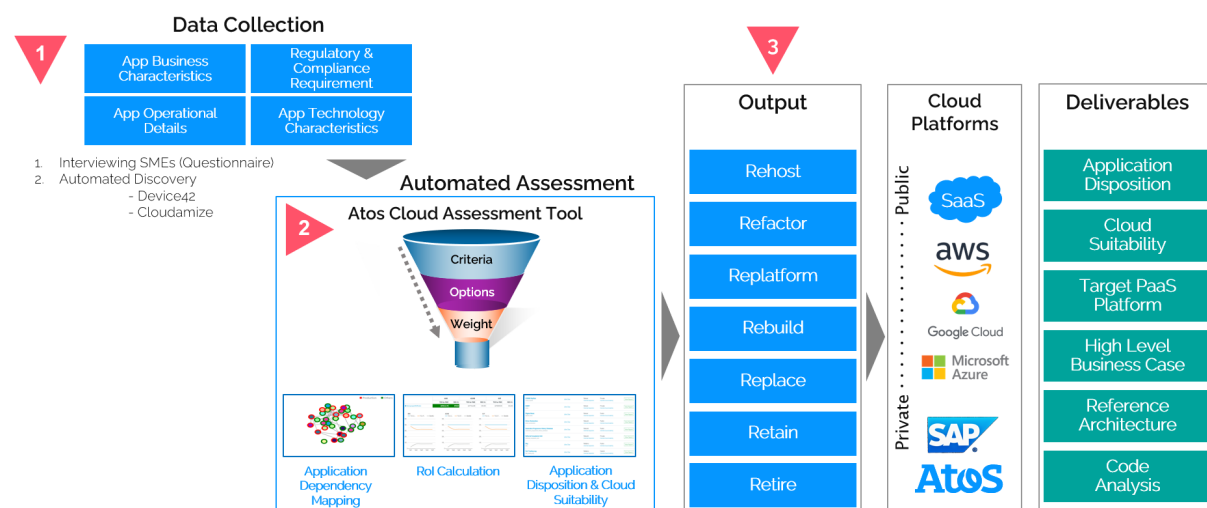

What does it deliver?

► Accelerated cloud adoption - Significantly reduces time to assess and design the right migration and modernization roadmap.

► Simplified application landscape - Reduce technical debt and complexity of enterprise landscape with migration and modernization.

► Building business case to drive ROI - Make objective cloud adoption decisions based on viable business case as part of cloud assessment.

► Reduce migration risk - Proven blueprints and accurate effort estimates reduce time to build modern architectures on cloud.

What technology does it use?

The Application Assessment offer leverages the Atos Cloud Assessment Tool (ACAT) to transform the IT landscape in a customer's journey to cloud with a detailed approach and business use cases. ACAT is one of the critical tools used by Atos to assess application cloud readiness, target architecture blueprints, and total cost of ownership (TCO) as customers prepare to transfer their workloads to cloud. ACAT includes Atos prebuilt cloud accelerators to help customers to take full advantage of cloud-native features and achieve their desired business objectives.

Atos' engagements start with a discovery and assessment of existing enterprise IT landscape, utilizing proven methodologies and easy integration with infrastructure discovery and third-party tools. An automated data-driven approach ensures data assimilation from various sources like CMDB and ITSM. Data is seamlessly fed into ACAT, which leverages Atos's patented algorithms to provide comprehensive dashboards with key application insights like cloud suitability model and cloud disposition.

What terms apply?

Termination

Termination shall be in accordance with:

► The G-Cloud Framework terms and conditions.

► Any terms agreed within the Call-Off Contract under Part A Order Form (Termination), where the Crown Commercial Service guidance states: 'The notice period needed for Termination is at least 30 days from the date of written notice for termination without cause.'

► Atos Supplier Terms for this Service are as listed on the Digital Marketplace.

For this specific service, by default Atos ask for at least thirty (30) days prior written notice of termination without cause.

Atos commits to continue to provide the service for the duration of the Call-Off Contract subject to the terms and conditions of the G-Cloud Framework Agreement, the Call-Off Contract, the Atos Supplier Terms and the applicable Third Party Agreements (as defined in the Atos Supplier Terms) related thereto.

How do I order?

Please send your requirements to the email address GCloud@atos.net. We will prepare a quotation and agree that quotation with you, including any volume discounts that may be applicable. Once the quotation is agreed, we will issue you with the necessary documentation (as required by the G-Cloud Framework) and ask you to provide us with a purchase order.

Once we have received your purchase order, the services will be configured to the requirements agreed. If appropriate, you will be provided access to our self-service portal to start provisioning of services.

If you are a new customer, additional 'new supplier' forms may need to be completed.

Invoices will be issued to you and Crown Commercial Services (CCS) (quoting the purchase order number) for the services procured. On a monthly basis, we will also complete the mandated management information reports to Government Procurement.

Why Atos?

Within this GCloud offering Atos can provide Proof of Concept (PoC), Proof of Value (PoV) and a wide range of general consultancy services where relevant. These services can be used by clients to shape their direction and improve outcomes; covering areas such as digital transformation, strategy & innovation, information governance and performance improvement.

Atos is a global leader in digital transformation with 111,000 employees and annual revenue of c. € 11 billion. European number one in cybersecurity, cloud and high performance computing, the Group provides tailored end-to-end solutions for all industries in 71 countries. A pioneer in decarbonization services and products, Atos is committed to a secure and decarbonized digital for its clients. Atos is a SE (Societas Europaea), listed on Euronext Paris and included in the CAC 40 ESG and Next 20 Paris Stock indexes.

The purpose of Atos is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.

Atos is widely credited with the highest standards for its pioneering efforts in sustainability, equality and inclusivity, for example:

► In 2021, Atos was selected once again as a member of both the Dow Jones Sustainability Index World and Europe) and EcoVadis, consultancy specialized in sustainability ratings and performance improvement for global supply chains, has awarded again Atos with the Platinum medal in 2021.
