

AWS Price List

Our minimum price is £0.00 for many services as there is a free tier offering for a number of AWS services.

There are three categories of free services:

- Always free - These free tier offers do not expire and are available to all AWS customers
- 12 months free - Enjoy these offers for 12-months following your initial sign-up date to AWS
- Trials - Short-term free trial offers are available through many different software solutions

Details and terms and conditions of Free Tier products are found at:

<https://aws.amazon.com/free/>

Standard Pricing

The AWS Price Calculator provides an estimate of usage charges for AWS services based on certain information you provide. Monthly charges will be based on your actual usage of AWS services, and may vary from the estimates the Calculator has provided. Please check your prices with the Calculator before purchasing.

The link to the latest AWS Price Calculator is: <https://aws.amazon.com/pricing/>

The calculator incorporates a wide array of pricing calculations across all our services in all regions. It also shows breakdown of features for each service in each region. Most customers use multiple AWS services in multiple regions. Hence the calculator has a mechanism to select a service in a particular region and add it to the bill.

Users can select a region and simply input the usage values of each service in that region and then click on the “Add to Bill” button. This will add the service to the bill. Once the service is added to the bill, the user can modify/update the input fields, and the calculator will automatically recalculate. Users can remove the service from the bill by simply clicking on the red cross button Delete in the bill. Each input field represents to be a value per month.

The calculator also shows common customer samples and their usage. Users can click on “Disaster Recovery and Backup” sample or “Web Application” sample and see usages of each service. We will continue to add new real-world customer samples in future. If you would like us to add your sample usage, please let us know.

Please call your Insight representative with any questions.
