FARYNOR™

WHAT WE DO

FARYNOR™ is a comprehensive and adaptable Fire Safety Records Management System for use by all UK Fire Services. It greatly improves fire safety by providing accurate and timely information and is fully compliant with Government requirements Regulatory Reform (Fire Safety) Order 2005 and helps services capture data required under the Building Safety Act 2022. A successful Cloud Service Outsourcing project needs a range of expertise:

COMPREHENSIVE FIRE SAFETY RECORDS MANAGEMENT

FARYNOR™ provides the ability to assess compliance with fire safety requirements in an accurate and timely manner, promoting the delivery of a clear plan of action, which concentrates activity on the highest risk first.

SAFE AND WELL

FARYNOR™ supports prevention teams in planning, scheduling and performing Safe and Well / Home Fire Safety checks.

FARYNOR™ supports full integration with a wide range of FRs systems and processes. These range from HR, for staff details, to corporate Gazetteers , for trusted, consistent location information.

Mobile working is supported both at the audit stage, in conjunction with off-line electronic forms, and through the delivery of key risk data to firefighters via in-cab mobile data terminals.

Performance management capability is built-in either as part of an extensive reports catalogue, including the annual Home Office (CLG) returns, or externally from your own reporting platform.

WHY US?

Atkins has been serving fire services for over 15 years and is well established in providing the FARYNOR™ solution to manage fire safety location data.

FLEXIBLE DESIGN LEAVES YOU IN CONTROL

The modular design with customisable job management system enabling the system to work the way you want to.
