*For a minimum of 24 months.

1. Software includes 1GB SaaS Storage per month for printing and reporting where appropriate
2. Standard Edition software only allows use with the HTML5 viewer and VertiGIS Studio Web
3. VSEE – Limits to 1 mobile user
4. VSE1 – Limits to 5 mobile users
5. VSE2 – Limits to 10 mobile users
6. VSE3 – Limits to 15 mobile users
7. VSE4 – Please contact for more information

Note that additional cores, RAM and Hard Disk can be added, prices for which will be calculated depending on a client's specific requirements.

"Production" means a live environment. A client's first instance must be a Production instance, even if applications hosted on the environment are not yet live.

"Non-Production" environments can be purchased once an initial Production instance has been purchased. These Non-Productions environments are typically used for Development, Testing, Staging, Failover.

Price/Licence basis:	• Licenced on a per-server, processor core basis
Price includes	<ul style="list-style-type: none"> • Standard server instances as shown above • Windows Server 2012 or Windows Server 2016 or Windows Server 2019 operating system • PostgreSQL/PostGIS database • Standard 1Spatial Support • IIS web server set-up
Price excludes:	<ul style="list-style-type: none"> • ArcGIS Enterprise (required and can be supplied on a "bring your own" basis or can be purchased from 1Spatial) • ArcGIS Identities (required and can be supplied on a "bring your own" basis or can be purchased from 1Spatial) • Security Software (including anti-virus) • Implementation of user authentication • Data services (uploading, structuring etc.) • Configuration of Geocortex Essentials/authoring of applications • Configuration of Geocortex Analytics reports/dashboards • Configuration of ArcGIS Enterprise • Back-up and recovery services • Failover server instances • Training services <p>All these services can be provided by 1Spatial</p>

In addition 1Spatial provides a Managed Service for a flexible and agile service for web mapping and GIS solutions.

Our Managed Service is backed by our team of geospatial data experts to help advise and configure your environment and solution deployment accordingly, along with a fully maintained cloud environment throughout the contract period. 1Spatial's Managed Service provides a full range of remote, onsite and emergency support services covering all key application, database and infrastructure technologies. As well as routine updates to maintain your environment we provide our support desk services, details of which can be found in the service definition documents.

Unlock the value of your data
