## 1Spatial 3D Data Management Cloud Service

1Spatial's 3D Data Management Cloud Service is powered by 1Integrate's 3D rules engine.

There are three deployment options to ensure that users are working with the most suitable setup to meet their requirements, but all require the 3D engine edition for 3D data management.

### Option 1: Deployment in client managed cloud

| Duration                           | 12 month subscription |                | 1 month price* |                |
|------------------------------------|-----------------------|----------------|----------------|----------------|
| Type                               | Production            | Non-Production | Production     | Non-Production |
| 1Integrate with one engine         | £38,100.00            | £19,050.00     | £3,200.00      | £1,600.00      |
| 1Integrate additional engines      | £19,200.00            | £9,600.00      | £1,600.00      | £800.00        |
| 1Integrate LITE with one engine    | £18,500.00            | £9,250.00      | £1,600.00      | £800.00        |
| 1Integrate LITE additional engines | £9,300.00             | £4,650.00      | £800.00        | £400.00        |
| 1Integrate 3D engine edition**     | £21,600.00            | £10,800.00     | £1,800.00      | £900.00        |

\*Monthly payment financial plan. Minimum term of 24 months. Pricing is locked for the term of the contract. (Please enquire for other term licence options).

\*\*1Integrate 3D Engine is an add-on for 1Integrate or 1Integrate LITE to process 3D data.

For option 1, 1Spatial's 3D Data Management Cloud Service is made available via a local download and installation of 1Integrate on a client managed infrastructure. This deployment option gives the user the full capability to apply data quality and data governance processes in their data management, with full confidence that no data is leaving their environment. This option is ideal for those who are handling sensitive and critical data which needs to be kept in a local secure environment, but also of a high quality for confidence in evidence-based decision making.

Please note the following terms for Deployment Option 1 of 1Spatial's 3D Data Management Cloud Service:

- The LITE version of 1Integrate provides all the validation capabilities of 1Integrate (rules) but does not provide the enhancement capabilities of 1Integrate (actions).
- Minimum term of two-year commitment
- If required for more complicated projects, Implementation Consultancy Services are available (see SFIA rate card).

## Option 2: To purchase a hosted Microsoft Azure Cloud Service

| Duration                           | 12 month subscription |                | 1 month price* |                |
|------------------------------------|-----------------------|----------------|----------------|----------------|
| Type                               | Production            | Non-Production | Production     | Non-Production |
| 1Integrate with one engine         | £47,350.00            | £23,050.00     | £4,000.00      | £3,550.00      |
| 1Integrate additional engines      | £28,450.00            | £13,600.00     | £2,400.00      | £1,200.00      |
| 1Integrate LITE with one engine    | £27,800.00            | £13,250.00     | £2,400.00      | £1,200.00      |
| 1Integrate LITE additional engines | £18,550.00            | £8,650.00      | £1,600.00      | £800.00        |
| 1Integrate 3D engine edition**     | £30,850.00            | £14,800.00     | £2,600.00      | £1,300.00      |

For option 2, 1Spatial's 3D Data Management Cloud Service is made available in a 1Spatial hosted cloud environment, which you can manage and configure to ensure that it continues to meet your requirements. This deployment option is ideal for those who are looking to run a Proof of Concept (PoC) on data quality without making changes to their existing environment.

### Price includes:

- Licence to 1Integrate as selected from the table above
- Standard 1Spatial Support and Maintenance agreements to cover products purchased and environment
- Set-up and creation of the cloud instance

### Price excludes:

- Configuring of software and ETL processes
- Configuration of Server or Cloud
- Environment reports/dashboards
- Training Services

## Cloud Specification

| Licence Type   | Number of Cores | RAM  | Hard Disk |
|----------------|-----------------|------|-----------|
| Production     | 8               | 32GB | Premium   |
| Non-Production | 4               | 7GB  | Standard  |

### Option 3: Managed Service by 1Spatial deployed to Microsoft Azure Cloud

1Spatial's Managed Service provides a flexible and agile service for the 1Spatial 3D Data Management Cloud Service. Our Managed Service is backed by our team of 3D data experts to help advise and configure your environment and solution deployment accordingly, along with a fully maintained cloud environment throughout the contract period. 1Spatial's Managed Service provides a full range of remote, onsite, and emergency support services covering all key application, database, and infrastructure technologies. As well as routine updates to maintain your environment we provide our support desk services, details of which can be found in the service definition documents.

Option 3 comes with bespoke configuration and as such please enquire for a full quote and further details. Pricing for a full managed service typically starts at £6,100 for 12 months and there is a tiered service available to match your organisation's needs.
