

Tranman Fleet Management

Improve fleet management efficiency and minimise compliance risks

Tranman Fleet Management software manages the complete vehicle lifecycle from procurement (including initial specification), through to order tracking and delivery, all the way to disposal. It integrates with all vehicle costs systems.

Customised fleet management dashboards display key vehicle information at a glance, so you can instantly monitor the overall status of your fleet, and drill down to individual vehicle information for more detailed enquiries.

Tranman automatically generates critical date reminders and coloured fields to highlight areas for attention, helping you to ensure each vehicle is fit for purpose, safe and compliant.

Why choose Tranman Fleet Management?

Tranman helps you to improve the quality of services delivered and achieve efficiency targets. It will increase workshop productivity, minimise vehicle downtime for repairs, improve accident and risk management, and enhance fuel usage controls.

We support 95% of UK police forces, 70% of UK fire and rescue services, 46% of UK ambulance trusts, over 100 local authority and government agencies, and more than 100 large organisations in the private sector.
