Scott Logic

Organisation Review & Design for Cloud Service Delivery

About Scott Logic

At Scott Logic, we build user-focused software that transforms the performance of our public and private sector clients. From citizen-centred service design to digital transformation projects, our consultants combine innovation, experience and pragmatism to deliver measurable results with every project.

Our onshore, UK delivery model allows us to attract and retain highly skilled technologists, all of whom are permanent employees, ensuring our clients receive the highest quality of service.

- **Architecture, Migration and Platform Engineering for Cloud**
- **API Platform**
- **Service Delivery for Cloud**
- **Service Design for Cloud**
- **Cloud Sustainability**
- **Legacy Modernisation**

Working with Scott Logic

Scott Logic employs only permanent, UK-based technologists who share and embody our guiding values of passion, respect, excellence, collaboration and professionalism. In this way, we ensure that you, as our client, receive the highest quality of service from genuine teams. All of our engagements have Principal-level oversight and Director-level sponsorship, providing clear lines of communication and optimal collaboration. This means we build long-term, enduring partnerships, which drive value and enable our clients to transform their businesses.

Scott Logic

Organisation Review & Design for Cloud Service Delivery

Adoption of Cloud, agile and DevOps is increasing across every sector, but the journey to maturity is far from easy.

Perhaps you're running IT or digital transformation projects using agile, Scrum or Kanban, but you're not sure you're doing it right. Perhaps you've successfully delivered agile IT projects, but you're finding it hard to scale to portfolio or programme level. Or maybe your IT department is running smoothly with agile practices, but the challenge is now to extend this to other parts of your organisation?

We can provide a disciplined approach to assess your current maturity state on agile or DevOps practices, and an incremental plan for improvement that is actionable immediately.

This will increase your ability to respond to changing business conditions and ensure you're better placed to harness innovation through successful delivery.

Wherever you are on your journey, our consultants and coaches can ensure your transformative journey into digital is a successful one.

> **Working with Scott Logic will enhance and accelerate your digital journey into the cloud.**

What sets us apart

At our core, we are pragmatists who enjoy delivering the right technology solutions to solve complex challenges, and assisting our clients in enabling their organisation to deliver success.

Coaching and mindset enablement

Our consultants can help you maximise performance at individual, team and organisational level. By encouraging and enabling the adoption of a continuous delivery and DevOps mindset, you'll see tangible benefits.

High-calibre permanent staff

We invest in high-calibre permanent staff and don't use contractors, ensuring that our teams are genuine teams of consultants who live and breathe our company ethos. **We are totally unaffected by changes to IR35 regulations.**

A record of achievement

15-year track record of building and nurturing successful relationships, advising clients on design and technology choices, managing full end-to-end project delivery.

At home in complexity

Market-leading technical thought leaders and innovators in complex, regulated environments.

Organisation Review & Design

Our consultants, coaches and professional technologists bring with them diverse and deep experiences, backed by disciplined agile and DevOps ways of working, to support the full delivery lifecycle. By using an empirical process where progress is measured through observation of reality, the result is predictable, high-quality value creation.

Agile and DevOps professionals

Our consultants are multifaceted professionals and subject matter experts with deep, real-life agile and DevOps experience. We "hit the ground running" as individuals or as part of new or existing Scrum teams, and we're able to support medium- and large-scale portfolio and programme level transformations, with immediate impact.

Features

- Operating model design for secure cloud service delivery

- Evidence-Based Management and empirical approach to measuring value

- Continuous learning and improvement

- Bespoke and targeted training

- Maturity assessments

- Empirical and disciplined approach

Benefits

- Organisational agility for service delivery in the cloud

- Improved organisational capability for digital transformation

- Solid understanding of organisational maturity in agile, DevOps and Cloud

- Cultivate similar skills, attitudes and cultural behaviours

- Perfectly positioned to help you build an enterprise-wide agile and DevOps capability to deliver high quality, valuable products

- Transforming your organisational capacity to deliver value, always promoting a sustainable development pace.

Interested in partnering with Scott Logic?

At Scott Logic, we love difficult. Our UK-based permanently employed consultants collaborate with some of the world's biggest organisations, providing a pragmatic approach to designing, developing and supporting cloud services that deliver measurable value.
