Cloud Integration and Security

Secure, integrated cloud solutions for the Enterprise across Oracle, AWS, Google Cloud Platform (GCP) and Azure.

Cintra Cloud Integration and Security Services

As cloud offerings across vendors continue to mature and diversify, so will the modern enterprise's need to capitalize on a secure, multi-cloud approach that leverages the best services at the best price from each provider, including internal IT.

Key Offerings

- AWS with Oracle Cloud
- Azure with Oracle Cloud
- GCP with Oracle Cloud
- Hybrid Cloud with Engineered Systems
- Hybrid Cloud with Commodity Systems
- Big Data / IoT Cloud Service Integration
- Security Architecture

Next-Level Solutions

Cintra can help design and implement your integrated cloud solutions across multiple cloud providers.

Cintra's unique experience and expertise building solutions within and across the major cloud providers means you can avoid cloud vendor lock-in and use a best-of-breed approach for your mission critical applications.

Cloud Transformation

A mature cloud strategy will need to incorporate a cloud services brokerage (CSB) model comprised of three roles: operators, enablers, and consumers.

Cintra can enable your consumption across cloud operators by providing deep expertise on the best ways to deploy Oracle technologies and integrate your solutions across the major cloud providers and your internal IT.

Benefits of adopting the CSB model include:

- Agility and Scalability
- Broader PaaS Portfolio
- IaaS Marketplace Cost Savings
- Tiered SLA and Service Management Capabilities
- Mature Cloud Governance
- Comprehensive Security

Commercial Architecture

Financial incentives may not be the number one reason for moving to cloud, but it will be a factor in your decision to stay there.

Cintra's team of architects and analyst can help you evaluate your existing support, licensing, and operations costs to help you better understand your existing Oracle IT spend requirements.

Once Cintra helps you establish a baseline, Cintra will work with you to develop the appropriate financial models to evaluate cost savings and benefits for using cloud as part of your long-term strategy.
