Cyber Incident Response Services

Take the first step today to protect your organisation from the risk of cyber attack

Take the first step today to protect your organisation from the risk of Cyber attack

Why do you need a Cyber Incident Response Service?

The industry adage is that there are two types of businesses: those that have been hacked and those that don't realise they have been hacked. This may sound a bit of a cliché but if you are the victim of a cyber-attack, what will you do? Do you have a documented, valid and proven incident response plan? You cannot afford to bury your head in the sand and hope that it will go away. A rapid, decisive and professional response could be the saviour of your business with the following benefits:

- Minimise/prevent data loss
- Reduce reputational/brand damage
- Limit financial penalties from Regulators
- Lessen operational downtime, loss of productivity
- Potential reduction in insurance premiums
- Known and agreed costs to assist in your budget planning

"The difference between a good incident and a bad one is in how you respond, the expertise of your response and the ability to learn from experience"
