

Service description

CSI's advisory service is trusted by UK's armed forces and government. CSI is a Certified Cyber Security Consultancy of the NCSC. Our consultants help organisations build the right foundations so that they can go on to implement effective, well managed, information and cyber security systems and controls.

CSI can help support provide consultancy based services through undertaking cyber security assessments which are carried out by a team of experienced and certified cyber professionals.

We at CSI can carry out cyber risk, Gap Analysis assessments; Security maturity assessments to identify vulnerabilities (within People, Processes & Technology) validate the effectiveness of security controls and processes and provide the support and advice required to address security risks and align to wider UK/EU frameworks.

Our Assessments of cyber risk and controls are performed against recognised frameworks: NIST Cyber Security Framework, CIS Critical Controls, ISO27001 & NCSC CAF (Cyber Assessment Framework). Policy And Processes.

CSI can deliver all required security Policies and Processes, specifically designed to reflect an organisations current situation and to cover essential areas of operation aligned to either NIST, ISO 27001, CE or any other framework of choice.

CSI's Qualified ISO27001 Lead Auditor partnerships offer expert consultancy services to help implement some, or all, documentation and processes required.

Our security assessments are an important tool to identify (within People, Processes & Technology) an organisation's defences, validate the effectiveness of security controls and processes and provide the support and advice required to address security risks.

At CSI, we offer different types of cyber security assessments which are carried out by a team of experienced and certified cyber professionals. Following the assessment, our expert team will be able to define a plan and help exercise reasonable governance, as well as devise an efficient next steps plan.
