

G Cloud 14 Responsiv Solutions

IBM API Connect Enterprise Hybrid & Reserved Instance on Cloud

*Special offer Pricing for G CLOUD clients on orders before 30 September 2025

Cloud Service

IBM API Connect Enterprise Hybrid and Reserved Instance on Cloud enables the Client to create, run, manage, and secure APIs and microservices allowing API developers and businesses to design APIs with enterprise-grade security policies. The Cloud Service also allows the sharing of APIs across organizational boundaries and environments, while gaining insight into API usage. The IBM Program included with the Reserved Instance and Hybrid Entitlement offering is IBM API Connect Enterprise.

IBM API Connect Enterprise Hybrid includes additional support for the clustering of a large number of nodes within a single datacentre and also across multiple datacentres when used in Client computing environment.

IBM API Connect Enterprise Reserved Instance is a single-tenant, multi-zone HA-capable deployment of API Connect leverages IBM Cloud services for common tasks like identity management, monitoring, auditing, and logging. The Cloud Service also includes the management, gateway, analytics, and portal server components, as well as tools for registering and managing existing gateways located on-premises and on third-party clouds. IBM API Connect Enterprise Reserved Instance includes entitlements to remote gateway services provided through the enabling software in this document.

The pricing below is current pricing for Reserved Instance and Hybrid Entitlement. There is also a Pay Per Use offering provisioned within a Multi-Tennant environment.
