*Special offer Pricing for GCLOUD clients on orders before 30 September 2025

Cloud Service

IBM Business Process Manager on Cloud is a software-as-a-service solution that provides a business process management platform for visibility and management of business processes. The Cloud Service includes process design, execution, monitoring, and optimization capabilities.

1. IBM Business Process Manager on Cloud One-Time Setup
   Client will be charged a one-time setup fee for the provisioning of the base Business Process Manager on Cloud service.
2. IBM Business Process Manager on Cloud Test Environment One-Time Setup
   Client will be charged a one-time setup fee for the provisioning of each Test Environment established.
3. IBM Business Process Manager on Cloud Process Runtime Environment One-Time Setup
   Client will be charged a one-time setup fee for the provisioning of each Process Runtime Environment established.

Optional Services

IBM Business Process Manager on Cloud Additional Author
The Cloud Service provides a purchase option for additional users to access and use the IBM Process Designer and/or IBM Integration Designer Enabling Software.

IBM Business Process Manager on Cloud Test Environment
The Cloud Service provides a purchase option for additional test environments for non-production use. Each test environment provides a separate virtual process server environment. Capacity for this environment is based on the number of Test Environment Users purchased.

IBM Business Process Manager on Cloud Process Runtime Environment
The Cloud Service provides a purchase option for additional process runtime environments for production or non-production use. Capacity for this environment is based on the number of Process Runtime Users purchased.

Overages: An overage occurs whenever the number of concurrent users for any given calendar day exceeds the purchased concurrent user quantity in effect for that month. For each calendar day in which an overage occurs, the maximum user quantity for that day will be logged. At the end of each month in which the overage threshold has been exceeded, you will be charged for the maximum user overage count for that month at the monthly per user rate in the tables that follow.
Overages do not occur with the Authorised User charging model.
