Cloudoko Ltd is registered in England & Wales under company number 09294405 | Registered office: 1 Derwent Business Centre, Clarke Street, Derby, DE1 2BU

Service overview

Cloudoko provides a consultancy service to support the migration of existing systems to Microsoft Azure services.

In our experience, transforming your business into a cloud-business is more than simply moving your systems and infrastructure into the cloud, your organisation needs to adopt a cloud-first mentality.

We can help with Azure integration, Azure Architecture best practice, DevOps and application modernisation.

Benefits to you

- Support from engineers highly experienced in Azure Cloud migration
- Remove risk posed by maintaining internal systems

Key features

- Support from engineers experienced in public sector migration projects
- Advanced setup of Azure services/hybrid solutions
- Consultancy on migration solutions/approaches
- Functional/performance testing of migrated systems

Planning

We can conduct an analysis of your business requirements and existing systems and create a bespoke plan defining options for how Azure services can be used to best effect.

Setup and migration

Depending upon requirements, we can implement development/migration tasks agreed at the planning stage or we can assist your development/operations staff in these activities.

We are a small, dynamic company with a highly skilled, agile workforce. To ensure that we work efficiently across several concurrent projects, we apply AGILE (Scrum) methodology to support the development lifecycle. We provide access to our Atlassian JIRA and Confluence toolset to our customers during development projects to foster effective collaboration. Being primarily a supplier to the public sector, we align many of our practices with those in the GDS Service Manual.

Quality assurance and performance testing

We can develop a test plan and automated testing to prove that functional and performance requirements of the migration to Azure services have been met.

Ongoing support

Our [service desk](#) is open during normal Cloudoko business hours (9am – 5pm UK time), however we do monitor the desk outside of these hours and will respond to emergency situations.
