Application Modernisation on Microsoft Azure

DOOTRIX

We're a different kind of cloud success partner

We believe that every organisation has the ambition to create a culture, and environment where technology empowers your people to deliver the best experiences, products and processes to enable the ongoing success of the business.

There is no greater evolution in technology in the last 5 years than the cloud. The cloud enables innovation by reducing the cost and risk of failure and friction to change. By providing a suite of cloud transformation services and capabilities, we are able to drive tangible change for our clients.

So whether your goals are focused on digital transformation, improving customer experience or increasing operational efficiency, we're always looking to leading edge technology and the latest innovation to bring our clients ambitions to life.

Microsoft Solutions Partner

British Business **excellence** Awards | LLOYDS BANK

The Tech Business of the Year Award 2023

Finalist 2023

Service for organisations seeking expertise and technology capabilities to re-design/architect, re-build and replace legacy-systems with effective, user-friendly and scalable solutions powered by micro-services in Azure.

Initial workshops to analyse strategic objectives and successive workshops to assess application modernisation readiness and build a proof-of-value that demonstrates solution effectiveness before implementation.Service for organisations seeking expertise and technology capabilities to re-design/architect, re-build and replace legacy-systems with effective, user-friendly and scalable solutions powered by micro-services in Azure. Initial workshops to analyse strategic objectives and successive workshops to assess application modernisation readiness and build a proof-of-value that demonstrates solution effectiveness before implementation.

Service features

Workshops to assess Application modernisation readiness

Accelerate design and development of complex applications

Micro-service and Azure native design for high-performance and scalability

Service benefits

Accelerated journey to digital transformation

Reduce operating costs

Improved performance, reliability and security

Automated global deployment through IaC

Reduce friction to change and feature development
