Project Management as
a Service

CHANGE CLIENTS CAN FEEL AT EVERY LEVEL

ABOUT THE SERVICE

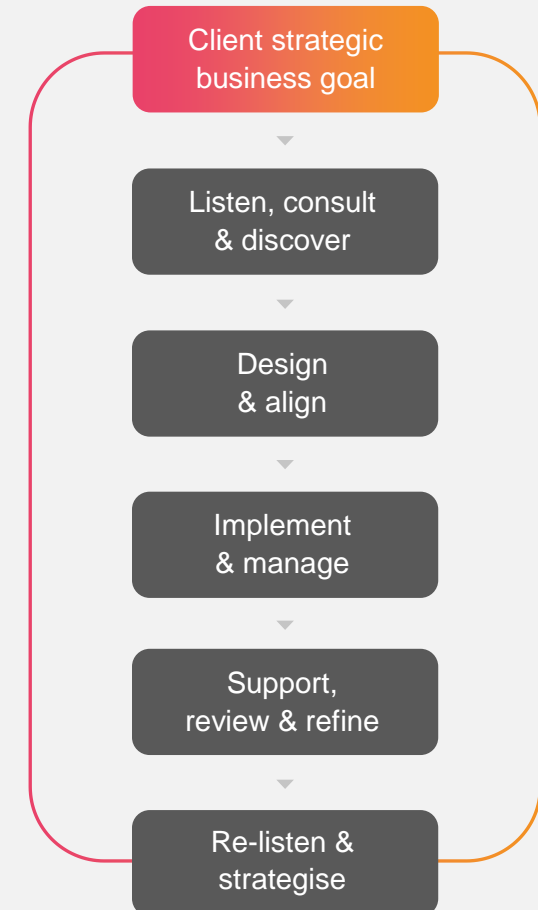

Project Management as a Service combines Waterfall and Agile methodologies to offer versatile project and programme leadership or support. Customised to meet specific needs, it provides strategic planning, governance, mentoring, and benefits realisation to ensure the successful delivery of projects, regardless of their complexity or duration.

This service includes Waterfall project management aligned with PRINCE2 and MSP frameworks, Agile delivery management based on AgilePM principles, and flexible leadership roles. It offers expertise in strategy development, comprehensive planning, team mentoring, and is focused on delivering tangible benefits. The service is adaptable, supporting various engagement models, and has a proven track record in a wide range of projects.

The benefits include flexible project management approaches tailored to project requirements, rigorous governance, enhancement of team skills through mentoring, tailored leadership for successful outcomes, effective change management, efficient risk management, timely project delivery within scope and budget, and the capturing of lessons learned for continuous improvement.

However, the service's success depends on clear communication, stakeholder engagement, and shared goals. It requires a precise scope definition and alignment of expectations, and may face challenges such as resistance to methodologies, resource limitations, and external project influences. A collaborative approach and commitment to adherence to frameworks and governance structures are crucial to overcoming these challenges and achieving project objectives.
