TeamNet Licencing options

There are two options for TeamNet licensing based on patient population factor (PPF)

1. Knowledge Compliance & Workforce

This plan provides the contract holder with access to utilise the rich knowledge management features that sit within the TeamNet platform which allows them and their associated teams to share information with GP practices and Primary Care Networks.

This plan also provides features to GP practices and Primary Care Networks to use TeamNet to manage their healthcare operations. Which means GP practices and Primary Care Networks can use TeamNet to manage compliance, HR and workforce management. We deem these GP practice and Primary Care Network features as "Internal" features.

A standard deployment allows the following:

● Portals for all member practices and PCNs

● Unlimited additional portals for the named customer for the purpose of supporting practices and Primary Care Networks

● Unlimited additional portals for others (e.g. Trusts) for the purpose of sharing information with the member practices and Primary Care Networks

● Unlimited users on the above

● sharing between practices, the named customer and others, including specialist and subgroups

● Group workshops/training sessions

● Project consultancy

Many service items (such as data, bandwidth, numbers of portals, numbers of users etc.) are unlimited by this model.

Licence pricing table

List Size	up to 200,000	200,001 - 250,000	250,001 - 350,000	350,001 - 400,000	400,001 - 600,000	600,001 - 999,999	1,000,000 +
Price per patient in pounds	0.1005	0.0970	0.0936	0.0901	0.0878	0.0843	0.0774

Annual prices per patient and all prices exclude VAT.

March 2026 offer

There is a temporary offer for areas with patient populations of over 2,000,000 who purchase TeamNet with the price per patient (PPF) as set out below, applying for contracts entered into before 31st March 2026

£0.0679 (PPF) TeamNet

All prices exclude VAT.

2. Knowledge

This plan provides the contract holder with access to utilise the rich knowledge management features that sit within the TeamNet platform which allows them and their associated teams to share information with GP practices and Primary Care Networks. This plan doesn't contain "Internal" features.

A standard deployment allows the following:

● Portals for all member practices and PCNs

● Unlimited additional portals for the named customer for the purpose of supporting practices and Primary Care Networks

● Unlimited additional portals for others (e.g. Trusts) for the purpose of sharing information with the member practices and Primary Care Networks

● Unlimited users on the above

● sharing between practices, the named customer and others, including specialist and subgroups

● Group workshops/training sessions

● Project consultancy
