Agile Design & Development Services

Service Definition Document

Morson Edge provides public sector organisations with high-impact technical consultancy across a diverse spectrum of technology services. By maximising efficiency, catalysing innovation, and unlocking new opportunities for value creation, we continue to empower the transformation of future-ready public services.

Service Definition for Agile Design and Development Services

Morson Edge's Agile Design and Development Services offer a tailored approach to address some of the unique challenges and requirements faced by public sector organisations. Through close collaboration with stakeholders and users, we develop an authentic understanding of the organisation's operational processes, user needs, compliance requirements, and strategic objectives. Morson Edge leverages this understanding to inform every stage of our design and development process, which is characterised by the following:

- **Enhanced user satisfaction:** Morson Edge prioritises user needs and preferences through agile user-centric design and development. This approach results in solutions that are more intuitive and engaging for end users leading to higher user adoption rates and improved satisfaction levels.
- Improved service delivery: By using agile methodologies, Morson Edge delivers
 iteratively to enhance delivery processes, drive greater efficiency, and achieve higherquality outcomes. Rapid prototyping, continuous feedback loops, and incremental
 delivery enable Framework Buyers to respond swiftly to changing organisational
 priorities.
- Increased adaptability: Agile methodologies are inherently flexible and adaptable, allowing organisations to respond quickly to changing priorities and requirements.
 Morson Edge development teams can adjust plans and priorities based on real-time feedback, ensuring that solutions remain aligned with user needs and business objectives.
- Transformed stakeholder engagement: Agile practices promote close collaboration between development teams and stakeholders throughout the project lifecycle. Through regular interactions, demos, and feedback sessions, Morson Edge cultivates a working environment that is characterised by trust and transparency, allowing us to understand and continuously support stakeholder and user needs.
- Culture of empowerment: Agile principles empower cross-functional teams to make
 decisions, solve problems, and innovate faster. Morson Edge works with Framework
 Buyers to foster a culture of autonomy, ownership, and continuous improvement.
 Leveraging an agile user-centric design and development process enables Morson
 Edge to unleash teams' shared creativity, expertise, and potential accelerating and
 improving outcomes.
- Continuous improvement: Morson Edge works with Framework Buyers to promote a culture of continuous improvement, where teams reflect on their processes, learn from their experiences, and strive for continuous improvement. We use retrospectives, peer reviews, and knowledge sharing to support ongoing learning and growth.

Morson Edge's Agile Design and Development Services are provided at the day rates cited within our Pricing and SFIA documents.

Service Features

- End-to-end design and development.
- User-centric design.
- Interactions, demos, and feedback sessions to facilitate end user understanding.
- Iterative development lifecycles enable rapid prototyping, testing, and adaptation.
- Cross-functional collaboration fosters shared ownership of project outcomes.
- Continuous development enables organisations to respond to shifting priorities.
- Retrospectives, peer reviews, and knowledge-sharing contribute to ongoing learning.
- Functionality alignment with organisational needs and end-user requirements.
- Scalable cloud architectures adapt to changing demands and growth.
- Migration, re-engineering, and transformation of legacy applications.

Service Benefits

- Optimal functionality and efficiency through tailored solutions.
- Higher-quality outcomes through continuous testing, iteration, and refinement
- Enhanced user satisfaction through prioritised user needs and preferences.
- Increased flexibility to respond quickly to changes in organisational priorities.
- Amplified engagement through close collaboration between stakeholders and developers.
- Cost savings through optimised productivity and efficiency.
- On-demand scalability without compromising performance or reliability.
- Increased productivity through streamlined workflows, automated processes.
- Ability to innovate faster and explore new ideas.
- Culture of autonomy, ownership, and continuous improvement.

Information Assurance

Morson Edge's information assurance capabilities support both our internal requirements for appropriate security controls and those of our customers. Our diverse portfolio of projects and customers mean that we have extensive experience in working with information and systems at all impact levels (IL 0 to IL 6+). We are a Cyber Essentials Plus certified organisation.

Data Restoration / service migration

We assist our customers in the migration of data from legacy solutions to new cloud solutions.

On-boarding and off-boarding processes / scope

Morson Edge agrees specific on/ off-boarding processes for all work packages. Agreed processes are always tailored to the individual requirements of the assignment in question. Requirements are clearly defined with the relevant customer stakeholders in order to ensure

the effective transition of individuals or teams alongside the management of data, assets, corporate memory and operational integrity.

Pricing overview

Please refer to Morson Edge's Pricing and SFIA documents.

Combination pricing

Morson Edge can provide multiple services in scope of G-Cloud Support Services. Our services can be bought separately or together. Combination pricing is offered accordingly.

Service management

A Service Account Manager is allocated to each customer assignment. This individual is responsible for overseeing the services in scope of the assignment. This individual closely monitors the assignment's progress, ensuring that any risks or issues are managed appropriately to ensure that all activities are delivered in accordance with the agreed assignment scope, key deliverables and timeframes. Through structured customer relationship management, our Account Manager remains in regular contact with the customer to ensure their satisfaction with Morson Edge's services.

Service constraints

Bespoke services, such as those in scope of G-Cloud 14, Cloud Support Services, are not subject to specific service constraints.

Service levels

Morson Edge recommends that we enter into performance-based Service Level Agreements with each of our customers. The implementation of bespoke service levels represents the positive obligation of both parties to deliver a mutually beneficial partnership which supports end user activities and facilitates effective measurement and monitoring of the assignment. Due to the diversity of services in scope of G-Cloud 14, Cloud Support Services, service levels must be closely tailored to each assignment. Agreed service levels form part of the Call-Off agreement which renders us contractually bound to deliver the agreed service levels.

Recompense model

Financial recompense for the services in scope of G-Cloud 14, Cloud Support Services, are related to the actual losses incurred as a result of specific engagement issues. Financial penalties must be aligned to the assignment in question, with the agreed financial recompense model included within the Call-Off Agreement.

Training

Wherever possible, Morson Edge ensures an effective knowledge and skills transfer from the consultant(s) to the customer. This empowers the customer and ensures the ongoing efficiency of the assignment and full embedding of the new system/service.

Ordering and invoicing

Morson Edge is an approved and accredited supplier to multiple government frameworks. We are used to working with customers to agree tailored ordering and invoicing processes. Typically, a purchase order is issued following the customer's confirmation of the purchase of a service and the signing of the Call-Off contract. Accompanying single or consolidated electronic invoices are issued with an authorised statement from the customer which confirms the number of units worked/charged for and the customer's satisfaction with the work undertaken and delivered. Payment terms are 30 days from receipt of invoice.

Termination terms

Morson Edge's standard terms and conditions include clauses which facilitate contract termination by either the consumer or the supplier.

By the consumer	By the supplier
event of a customer citing dissatisfaction with the service provided and the issue not being rectified within an agreed timeframe, or in the event of a material breach of contract.	In the unlikely event that Morson Edge was to withdraw from G-Cloud 14, Cloud Support Services, a minimum 30 days' notice would be served. Ongoing assignment commitments would be maintained through to completion in accordance with the terms of the Framework Agreement.

Customer responsibilities

Customer responsibilities are closely aligned to the assignment and as such, these must be discussed and agreed with the customer prior to the commencement of the assignment. All responsibilities are clearly cited within the Call Off contract.

Technical requirements / service dependencies

The technical requirements / service dependencies for the services offered under G-Cloud 14, Cloud Support Services, are specific to each Call-Off. Such detail must be discussed and agreed with the Customer prior to the commencement of the assignment.

Trial services

In the event that a customer wishes to engage Morson Edge's services on a trial basis, we will work with the Customer to agree an appropriate trial period.

Social Value Commitment: Supporting the government's 25-Year Environmental Plan (25YEP)

Morson Edge is an ISO 14001 accredited business which has the correct processes, procedures, and systems in place to manage environmental issues – enabling us to effectively support the Government's 25-Year Environment Plan (YEP) and Environmental Improvement Plan (EIP) by matching improvement initiatives with targets to measure progress. Over the years, we have continued to challenge our ability to reduce the impact that our business operations have upon the environment as we work towards our target of Net Zero by 2030.

Adapting to climate change

Reducing our carbon footprint and working towards Net Zero by 2030 requires a multifaceted approach. Morson Edge is committed to reaching this target by reducing energy consumption, investing in renewable energy sources, deploying hybrid/ electric vehicle fleets, promoting hybrid working, sustainable procurement, and carbon off-setting.

Minimising waste

Environmentally sound waste management and recycling facilities are available at all Morson Edge offices, and we divert all non-recyclable waste for energy processing. This helps reduce reliance on fossil fuels, generates renewable energy, and minimises the environmental impacts associated with waste disposal, in accordance with the priorities of the 25YEP.

Enhancing biodiversity

As part of the Morson Group, Morson Edge partners with Treeapp to support its reforestation efforts. We always identify suitable planting sites based on ecological considerations and select tree species that are well-adapted to the local environment, to maximise their ability to support biodiversity protection in the community.

STEM focus

The Morson STEM Foundation continues to change lives by creating new pathways into education and training. With participants developing a deeper understanding of environmental issues and the scientific principles underlying them, through STEM education, communities can build a more environmentally conscious and resilient future.

Sustainable procurement

Morson Edge always endeavours to work with local suppliers, and we proactively target SMEs and minority owned suppliers to promote diversity and sustainability in the supply chain within local communities.

TOMs Framework

We consistently demonstrate our commitment to local environmental objectives by transparently reporting on environmental initiatives using the National TOMs Framework for measuring Social Value.
