CREDERA OVERVIEW

Credera is a digital consultancy that helps leading brands unlock extraordinary results

We help our clients across five main areas

STRATEGY

We help organisations to build a strategy that delivers them the results they need to create and sustain their competitive advantage

TRANSFORMATION

We help organisations change the way they succeed in operations, technology, strategy, and innovation to ignite business results

CLOUD

We help organisations to harness the benefits of the cloud, to enable tangible business outcomes, through strategy, architecture, delivery, and optimisation

DATA

We help organisations transform the way they work by exploiting the power of their data and applying practical data approaches

ENGINEERING

We help organisations to deliver technology platforms, taking a holistic approach that addresses tech, process, and structure to make a lasting impact

Our teams bring deep capabilities in five core disciplines, and many of our client engagements span multiple areas of focus

CAPABILITIES

Credera's capabilities span the disciplines of management consulting, user experience, data, AI and technology solutions

MANAGEMENT CONSULTING

We partner with clients to define and implement strategies and modern operating models that enable high performance and sustainable growth.

eCOMMERCE

We help our clients go beyond a functioning consumer website by leveraging a dynamic strategy, robust implementation, and actionable optimisation.

INNOVATION

We help companies to innovate better by applying a structured approach that spans the stages of the innovation journey.

AI

Our proven offerings dramatically accelerate our client's journey to building a data culture.

EXPERIENCE DESIGN

We craft distinctive experiences that connect our clients to their customers so both sides better understand each other and achieve their goals efficiently.

CLOUD

We help clients plan their cloud journey, build cloud-native solutions, transform operating norms, modernise and optimise apps, and prepare teams to support it.

MARTECH

We help our clients implement, customise, and activate technology that powers profitable and harmonious cross-channel experiences.

DATA

We help clients capture and refine their data to optimise business value through improving efficiency and accelerating decision making.

OUR GLOBAL PARTNERSHIPS

We partner with leading platforms and providers

Our global partnerships industrialise our consulting offering and accelerate our clients' dynamic customer experience (DCX) ambitions

OUR EXPERIENCE

We bring deep public sector experience

Our team has helped organisations of all sizes across the public sector with initiatives spanning strategy, transformation, cloud, data, and engineering

Our Service Offerings

Data

Analytic Data Product Engineering	Data Warehouse Modernisation
Cloud Data Transformation	Realtime Analytics Platform Development
Cloud Data Platform Governance, Privacy	Data Pipeline Development & Deployment (DataOps)
Data Analytics Transformation	Data Analytics Delivery
Data and Analytics Maturity Assessments	Data Visualisation
Data Engineering	Machine Learnings Model Development and Deployment (MLOps)
Data Management Capabilities Review	
Data Mesh Transformation	Data Platform
Data Migration	Data Platform Service
Data Mesh Transformation	GCP Platform Engineering
Data Migration	AWS Data Platform Engineering
Data Capability Review	Azure Data Platform Engineering
Customer Data Strategy	Microsoft Fabric
	AWS Data Zone/Lake Formation

Cloud

Data Warehouse Modernisation

Credera provides services to lead the complete transition from existing legacy data warehouse technologies across to modern cloud technologies to support the growth demands of businesses. Credera has experience in the complexity of unravelling large and intertwined data warehouses that have often been built up over many decades of development.

Features

- Scoping and assessment of current state architecture
- Multi-cloud target architecture and integration into the IT estate
- Delivery roadmap definition and migration plan
- Data migration strategy and planning
- Workload 'migration factory' setup (where applicable and beneficial)
- Data engineering services
- SaaS (Snowflake) target architecture and integration into the IT estate
- SaaS (Databricks) target architecture and integration into the IT estate

Benefits

- Clearly scoped approach for large and complex migrations
- Phased delivery approach focused on unlocking customer value early
- Vastly improved data warehouse scalability and performance using modern technologies
- Clear migration progress reporting to key stakeholders
- Assurance on like-for-like (or improved) reporting post migration
- Automation of migration process to aid smooth and efficient transition
- Improved analytics and reporting through increased data discovery and innovation

Data Warehouse Modernisation

SERVICE DEFINITION

OUR PERSPECTIVE

- While data warehousing is a mature and established architectural pattern within most enterprise organisations, many existing data warehouses have evolved beyond their original scope, facing increased demands on non-functional requirements and analytical performance.
- Frequently, these older systems struggle to leverage modern cloud technologies' scaling and processing efficiencies and integrate effectively with their surrounding ecosystems.

SERVICE PURPOSE AND OBJECTIVES

- Our service is designed to guide organisations through the complete transition from legacy data warehouse technologies to modern cloud-based solutions, supporting the growing demands of businesses while simplifying complex systems.
- Credera facilitate the full transition of data storage infrastructures from outdated legacy systems to modern cloud technologies that enhance scalability and performance.
- Acting as a 'critical client for our clients, we unravel the complexities of large and intertwined data warehouses that have developed over many decades, making them more manageable and efficient. Our teams enhance the integration of analytical and operational capabilities within data warehouses, enabling effective leverage by broader tooling ecosystems.

OUR APPROACH

- We ground our approach in understanding the business goals and strategies, ensuring a deep comprehension of where data comes from, where it goes, and why and how it is processed.
- We define transformation rules, data segmentation rules, and modernisation rules, including remediation and correction from the source.
- We deploy new warehouse functionality incrementally alongside batches of enabling data, ensuring a smooth transition with minimal disruption.

OUR CAPABILITIES

- We provide experienced data architects who define an overarching end vision to guide the architecture alongside engineers who build and deliver incrementally, aligning local actions with global strategy.
- Our team includes seasoned data architects who articulate clear visions for data architecture and skilled engineers who build and optimise data solutions.
- We offer business analysts who capture business priorities and define the scope of data delivery to ensure alignment with business needs.

OUR EXPERIENCE

- We have successfully led data warehouse modernisation projects across sectors such as public, finance, insurance, and energy. For example, for a leading insurer, we led the design and implementation of a new enterprise Snowflake ecosystem, developed effective usage playbooks, and managed cross-business transformation programmes for successful adoption.

Credera Operational Framework

Our operating framework is designed to uphold the highest standard of excellence across all aspects of our engagements. We ensure superior quality assurance through performance evaluations and integrated client feedback. Our account management processes are built on a deep understanding of our clients' needs, ensuring a personalised service and sustained engagement. Our delivery methodologies are rooted in efficiency and adaptability, utilising our deep experience and best practices to achieve timely and successful outcomes.

We adhere to strict standards and policies to maintain integrity and reliability, whilst our commitment to ecosystem collaboration enhances our ability to leverage diverse insights and expertise across industries.

Central to our approach are our core values: Humility, Tenacity, Excellence, Integrity and People First, which guide our every decision, underscoring our dedication to ethical business practices and client service.

Exploit the power of your data

We make organisations faster, smarter, and more efficient in their decisions by helping them reimagine their business problems in ways that apply data and algorithms to outmanoeuvre competitors

OUR CULTURE

Our consultants are qualified beyond their specialisms

Achieving accreditations plays a big role in ensuring our consultants are well equipped for any challenge

75%
CLOUD CERTIFIED

With certifications spanning Azure, AWS, GCP, Adobe, Pega, Salesforce, etc.

84%
DIGITAL CERTIFIED

Including certified SAFe Practitioners, Scrum Masters, and Product Owners

46%
DATA CERTIFIED

Ranging from architecture, modelling, analysis, and visualisation

Additional Information

PRICING

This service is priced in accordance with the SFIA rate card provided and can be modelled using a range of commercial approaches e.g. time & materials, fixed price, risk/reward and velocity based, etc.. Please refer to our pricing document for more information.

ORDERING/INVOICING

Unless otherwise agreed in the proposal, all fees and charges associated with the engagement will be invoiced monthly in arrears. Invoices shall be paid by the client within thirty (30) days of the date of the invoice.

ONBOARDING / OFFBOARDING

Credera's cloud support services can be ordered by contacting our team via the detailed given in the 'Contact Us' section of this document. Clients can terminate their engagement with us with 30 days' notice.

Additional Information

CONSUMER RESPONSIBILITIES

Consumer responsibilities are closely aligned with the specific requirements of the engagement. As such, these responsibilities must be discussed and agreed upon with the customer before the engagement begins. All responsibilities are clearly outlined in the call-off contract/order form.

TECHNICAL REQUIREMENTS

The technical requirements and dependencies for the services offering under G-Cloud 14 are tailored to each individual call-off. It is essential to discuss and agree on these details with the customer before the engagement commences.

SERVICE CONSTRAINTS

There are no constraints to this service. We work collaboratively with our clients to identify their needs.

TRAINING

Credera strives to facilitate a seamless transfer of knowledge and skills from our consultants to our clients' teams, ensuring an effective and beneficial learning experience.

The Credera Difference

Working with the right partner is crucial to program success. At Credera, consulting is not just solving a tough problem or creating growth, it's that and so much more.

Our clients consistently tell us that working with Credera feels different. Our collaborative approach leaves them feeling empowered, supported, and secure and makes tackling challenges together enjoyable.

That's the Credera Difference.

Excellent engagement with experienced people providing good quality guidance and advice, responding to changing situations quickly and effectively, and producing substantive materials for us to build on.

Stuart Moore

Head of Crown Hosting,
HMRC

Credera's advice, professionalism and collaborative ways of working over a three-year period have been instrumental to the successful delivery of this major transformation programme.

John Quinn

COO, Government of Jersey
