

## PRICING

### Deliverables

Brightsolid Managed Dynamic Compute Solution provides customers with an environment which includes:

- Tiered solutions so you can flex your capacity, to the required need;
- Regularly updated pre-configured zero-touch base deployment images, ready to be used to create target images;
- Monitoring of performance metrics and system events for Auto-scaling Groups, Target Operating Systems, Elastic Load Balancers;
- Ad-hoc autoscaling and load balancer maintenance;
- Managed roll-out of patched or updated workload images;
- Fully managed service, supported 24 hours by Brightsolid's Service Desk and Cloud Engineers.

Dynamic Compute Management	Monthly Charge	Annual Charge
Tier 1: Maximum 3 hosts	£159	£1,900
Tier 2: Maximum 6 hosts	£259	£3,100
Tier 2: Maximum 9 hosts	£359	£4,300

Larger Host Groups available upon request, priced to requirement

Brightsolid's Dynamic Compute service is only available to customers with Brightsolid's Cloud Foundations solution. Brightsolid, purely on a discretionary basis, may offer this service free of charge to customers as a promotional activity.

Charges for the utilisation of AWS IaaS, PaaS and SaaS services launched as dynamic compute from this service are not included in the management charge but shall be invoiced separately from Brightsolid and charged according to AWS standard prices.
