PROFESSIONAL SERVICES

Company Overview

Credible, Trusted Advisor to the Public Sector

Brightsolid is a Scottish privately owned and operated organisation specialising in **providing managed hybrid cloud solutions** to medium to large size enterprises in Scotland across Public Sector, Oil & Gas, Financial Services and more.

We provide guidance and expertise to those organisations undergoing **digital transformation** with flexible, future-proof infrastructure that offers a balance of cost optimisation, efficiency, innovation and agility.

We support organisations to **modernise their IT environments** enabling performance and security and delivering flexibility and value for money.

Our managed hybrid cloud solutions are **unique to Scotland**, spanning: on-premise expert colocation, private cloud, public cloud, and more.

We have been providing services designed and priced to deliver value for the Scottish Public Sector for **25 years** and are committed to being a credible, trusted cloud advisor.

Service Overview

Global events have clearly demonstrated the high value of hybrid and public cloud models, as organisations are demanding flexible and dynamic infrastructures to support their changing business needs. Cloud models, for many, hold the key to business transformation, thanks to the agility and flex, control and security they provide to IT environments.

Journey to Cloud is a packaged consulting solution which consists of an interactive half-day workshop, a pre-workshop meeting, and defined post workshop deliverables, contextualised to your requirements and the output from the workshop.

This business-focused Brightsolid service will provide your organisation with a clear understanding of the benefits that can be offered by hybrid and public cloud models, helping support your organisation to plan your journey, roadmap and strategy to successfully enable cloud services aligned to your business needs.

Benefits of this service

- Understand what a successful cloud transformation looks like, as part of your organisational transformation.
- Clearly understand what cloud model could be suitable for your needs, and how your organisation will benefit from hybrid and/or public cloud services.
- Have validated your vision of the possibilities and benefits of cloud services.
- Have a level of comfort in the capabilities of Brightsolid to support you as your cloud partner.

Service Detail

Deliverables

Pre-Workshop: Brief call to discuss current state, business priorities, cloud adoption drivers, challenges and other initiatives.

Workshop: This will be a half-day interactive session, which we can run virtually, or face-to-face. Having captured your business objectives and considerations during the pre-workshop call, this workshop will help you create shared understanding around:

What are the different cloud models?

What clouds suit what needs; and what clouds could best suit our needs?

What are the considerations and benefits of each?

What skills and knowledge do we need to implement these?

Post-workshop report

After successfully completing the workshop, you will be provided with:

A one-page cloud journey strategy report, which will support the formulation of your wider cloud strategy

A complete write-up of the results and information from your cloud journey workshop; perfect to share in your organisation to build knowledge and confidence around cloud models and Brightsolid capabilities

High-level discussion proposal to help you take your next steps on your journey
