

Deliverables

Cloud Migration

Brightsolid's Cloud Migration service is a high flexible offering where Brightsolid, working in conjunction with your teams through workshops, on-site and remote working and documentation, help you plan and execute your cloud migration strategy, including ensuring:

- Clarity of strategic objectives and motivations for change
- Planning sessions with stakeholders to understand cloud migration aspirations
- Development of business case - demonstrating efficiency gains and estimation of potential savings and reduced cost
- Assessment & dependency mapping of applications/platforms to be migrated;
- Best practice design of target cloud architecture environments
- Workload and application migration planning and design
- Step-by-step plan for migration (with milestones) involving all stakeholders;
- Migration execution; establishing migration factory, build and configuration of target environment
- Migration of single application through to multi datacentre environments leveraging enterprise class toolsets and technology
- Pre/post migration application interdependencies and operational support

After initial discussions Brightsolid will craft a consultancy engagement specific to your organisations exact needs and prepare a full statement of works for each engagement, priced according to our rate card, with technical consultant rates as follows:

Professional Service

Day Rate
