Voyagerr Demand Response Transport Pricing Schedule

Provision of safe, timely and cost-efficient school transport can be a juggling act for council staff. Hundreds of hours can be spent each year managing the issue of bus passes, enquiries from parents, and operator invoices. With funding constrained for many authorities, it is vital to manage these processes quickly and affordably. This is where Voyagerr's solution comes in.

Voyagerr is a new way to manage schools and adult special transport and processes. Developed in collaboration with existing Voyagerr's school transport customers, it provides a web based user-friendly interface and responsive apps designed around the specific requirements of a variety of system users - from applications to transport officers and those who manage interactions with transport providers.

With Voyagerr, all aspects of school and adult transport can be managed from one place – and all processes are linked so that data is entered once and flows seamlessly through all areas. Meanwhile, powerful algorithms ensure staff have the support needed to manage transport provision efficiently and simply for passengers with complex needs.

Module	Comments	License Cost	Yearly Maintenance
Core	Up to 2,500 clients	£ 17,000.00	£ 21,000.00
